• Contributors are internationally known experts • Richly illustrated • Focuses on the differences of diagnostic methods between Japan and other countries by using endoscopic and pathologic pictures • For the first time, the Japanese progress in the field is published in English and made accessible to researchers worldwide Almost all scholars look to Acts 6:1-8:3 as providing the bedrock of early Christian tradition. The incident between the Hebrews and the Hellenists are understood to reflect real historical and theological problems in the early Jerusalem community, demonstrating the Hellenist role as a historical bridge between Jesus and Paul. Penner's study challenges the fundamental assumptions of this approach. Penner emphasizes the rhetorical and moral dimensions of ancient historiographical theory, especially the centrality of narrative and plot, the use of vivid description, the application of comparison using various type-scenes, and the role of speeches in terms of characterization and the presentation of narrative style. Todd Penner is the Assistant Professor of Religion at Austin College and the co-editor with Caroline Vander Stichele of Contextualizing Acts: Lukan Narrative and Greco-Roman Discourse. Includes

entries for maps and atlases. February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index

Nonlinear optics has been a rapidly growing field in recent decades. It is based on the study of effects and phenomena related to the interaction of intense coherent light radiation with matter. *Physics of Nonlinear Optics* describes various major nonlinear optical effects, including physical principles, experimental techniques, up-to-date research achievements, and current or potential applications. This book features clear conceptual descriptions, concise formulations, and emphasizes both theoretical and experimental aspects of nonlinear optics. The readability of this book is particularly enhanced by a series of color photographs showing the spectacular appearances of various nonlinear optical effects. Both authors of this book are outstanding research scientists renowned in their professional areas. Their major research achievements in nonlinear optics include the pioneering studies of two-wave-coupled refractive-index change, Raman-enhanced self-focusing, optical-frequency Pockels effect, stimulated Kerr scattering, optical phase-conjugation via backward stimulated emission, and two-photon-absorption based optical limiting, stabilization and reshaping.

Florida 1928. In einer einzigen Nacht erzählt Janie ihrer besten Freundin Pheoby wie sie

aufbruch, ein anderes Leben zu führen, den viel jüngeren Tea Cake traf, endlich das Glück fand, und was geschah, als der große Hurrikan kam ... Von ihrer Reise kehrt Janie als ein neuer Mensch zurück - und mit ihr alle, die ihre Geschichte hören. Der Klassiker aus den USA, zum 120. Geburtstag der Autorin neu übersetzt, gehört zu den schönsten, traurigsten und herzergreifendsten Liebesgeschichten, die je geschrieben wurden.

A Comprehensive Guide to Toxicology in Preclinical Drug Development is a resource for toxicologists in industry and regulatory settings, as well as directors working in contract resource organizations, who need a thorough understanding of the drug development process. Incorporating real-life case studies and examples, the book is a practical guide that outlines day-to-day activities and experiences in preclinical toxicology. This multi-contributed reference provides a detailed picture of the complex and highly interrelated activities of preclinical toxicology in both small molecules and biologics. The book discusses discovery toxicology and the international guidelines for safety evaluation, and presents traditional and nontraditional toxicology models. Chapters cover development of vaccines, oncology drugs, botanic drugs, monoclonal antibodies, and more, as well as study development and personnel, the role of imaging in preclinical evaluation, and supporting materials for IND applications. By incorporating the latest research in this area and featuring practical scenarios, this

reference is a complete and actionable guide to all aspects of preclinical drug testing. Chapters written by world-renowned contributors who are experts in their fields Includes the latest research in preclinical drug testing and international guidelines Covers preclinical toxicology in small molecules and biologics in one single source This volume gives readers a balanced examination of the educational accountability movement that has swept the United States. Optical coherence tomography (OCT) is the optical analog of ultrasound imaging and is emerging as a powerful imaging technique that enables non-invasive, in vivo, high resolution, cross-sectional imaging in biological tissue. This book introduces OCT technology and applications not only from an optical and technological viewpoint, but also from biomedical and clinical perspectives. The chapters are written by leading research groups, in a style comprehensible to a broad audience. Each number includes section: The technical press index. Danyers afterwards liked to fancy that he had recognized Mrs. Anerton at once; but that, of course, was absurd, since he had seen no portrait of her-she affected a strict anonymity, refusing even her photograph to the most privileged-and from Mrs. Memorall, whom he revered and cultivated as her friend, he had extracted but the one impressionist phrase: "Oh, well, she's like one of those old prints where the lines have the value of color." He was almost certain, at all events, that he had been thinking of Mrs. Anerton as he sat over his breakfast in the empty

hotel restaurant, and that, looking up on the approach of the lady who seated herself at the table near the window, he had said to himself, "That might be she." Ever since his Harvard days-he was still young enough to think of them as immensely remote-Danyers had dreamed of Mrs. Anerton, the Silvia of Vincent Rendle's immortal sonnet-cycle, the Mrs. A. of the Life and Letters.
