The book provides an overview of the fascinating spectrum of semiconductor physics, devices and applications, presented from a historical perspective. It covers the development of the subject from its inception in the early nineteenth century to the recent millennium. Written in a lively, informal style, it emphasizes the interaction between pure scientific push and commercial pull, on the one hand, and between basic physics, materials, and devices, on the other. It also sets the various device developments in the context of systems requirements and explains how such developments met wide ranging consumer demands. It is written so as to appeal to students at all levels in physics, electrical engineering, and materials science, to teachers, lecturers, and professionals working in the field, as well as to a non-specialist scientific readership. When the famous South African fish scientist Professor JLB Smith published *Old Fourlegs – The Story of the Coelacanth* in 1956 he created an international sensation. After all, this 400-million-year-old fish, known only from fossil remains, was thought to have become extinct around 66 million years ago! JLB Smith's dramatic account of the discovery of the first and second coelacanths in 1938 and 1952 turned him into a cult figure and put South African science on the world map. His book was eventually published in six English editions and translated into nine foreign languages. Mike Bruton's *The Annotated Old Fourlegs* includes a facsimile reprint of the original book, to which he has added notes and images in the margins that provide an interesting and revealing commentary on Smith's text, as well as new introductory and explanatory chapters that bring the coelacanth story up to date. **NEW YORK TIMES BESTSELLER** • "A brilliant storyteller, a master of sarcasm, and a hallucinatory stylist whose obsession with the impress of the past on the present binds him to Southern literary tradition."—The Boston Globe Pat Conroy's great success as a writer has always been intimately linked with the exploration of his family history. As the oldest of seven children who were dragged from military base to military base across the South, Pat bore witness to the often cruel and violent behavior of his father, Marine Corps fighter pilot Donald Patrick Conroy. While the publication of *The Great Santini* brought Pat much acclaim, the rift it caused brought even more attention, fracturing an already battered family. But as Pat tenderly chronicles here, even the oldest of wounds can heal. In the final years of Don Conroy's life, the Santini unexpectedly refocused his ire to defend his son's honor. *The Death of Santini* is a heart-wrenching act of reckoning whose ultimate conclusion is that love can soften even the meanest of men, lending significance to the oft-quoted line from Pat's novel *The Prince of Tides*: "In families there are no crimes beyond forgiveness." Praise for *The Death of Santini* "A painful, lyrical, addictive read that [Pat Conroy's] fans won't want to miss."—People "Conroy's conviction pulls you fleetly through the book, as does the potency of his bond with his family, no matter their sins."—The New York Times Book Review "Vital, large-hearted and often raucously funny."—The Washington Post "Conroy writes athletically and beautifully, slicing through painful memories like a point guard splitting the defense."—Minneapolis Star Tribune A fascinating insight into the true history of British police corruption, for fans of the hit BBC 1 drama. For more than a century, police officers used their uniforms to control and bully criminals, which in turn led to wholesale bribery and corruption. From Victorian times up to the 1950s, this crooked atmosphere tainted the UK police image of the 'friendly Bobby'. Then came the 1960s and 1970s when the Great Train Robbery and other bigtime heists changed the rules of the 'game' forever. It was like the Wild West out there. No one knew who were the good guys and who were the bad guys anymore. By the early 1980s, corruption was endemic amongst London's vast force of detectives. It was only now that Police commissioners across the nation finally started to tackle endemic, across the board corruption. The hit BBC show has brought these stories back to the fore and in *The Line of Duty - The Real Story* we go behind the contemporary headlines to explore the real inspiration behind the hit show, looking back at the history of corruption in the police, and the anti-corruption units that were set up to sniff out the bent coppers among the good. Referencing real-life historic and notable cases and people, from a range of sources and first-person interviews, *The Line of Duty - The Real Story* tells the truth behind the fiction, and its hard-hitting impact on real life modern policing. A vivid account of the story of Rome from the earliest times to the death of Augustus, retold for children, chronicling the birth of a city and its growth through storm and struggle to become a great world empire. Gives short accounts of battles and campaigns, and of the men who expanded the borders of the Roman empire to include all lands bordering the Mediterranean Sea. "It seems to be certain," says the Abbé McGeoghehan, "that Ireland continued uninhabited from the Creation to the Deluge." With this assurance to help us on our onward way I may venture to supplement it by saying that little is known about the first, or even about the second, third, and fourth succession of settlers in Ireland. At what precise period what is known as the Scoto-Celtic branch of the great Aryan stock broke away from its parent tree, by what route its migrants travelled, in what degree of consanguinity it stood to the equally Celtic race or races of Britain, what sort of people inhabited Ireland previous to the first Aryan invasion--all this is in the last degree uncertain, though that it was inhabited by some race or races outside the limits of that greatest of human groups seems from ethnological evidence to be perfectly clear. When first it dawns upon us through that thick darkness which hangs about the birth of all countries--whatever their destiny--it was a densely wooded and scantily peopled island "lying a-loose," as old Campion, the Elizabethan historian, tells us, "upon the West Ocean," though his further assertion that "in shape it resembleth an egg, plain on the sides, and not reaching forth to the sea in nooks and elbows of Land as Brittain doeth"--cannot be said to be quite geographically accurate--the last part of the description referring evidently to the east coast, the only one with which, like most of his countrymen, he was at that time familiar. Geographically, then, and topographically it was no doubt in much the same state as the greater part of it remained up to the middle or end of the sixteenth century, a wild, tangled, roadless land, that is to say, shaggy with forests, abounding in streams, abounding, too, in lakes--far more, doubtless, than at present, drainage and other causes having greatly reduced their number--with rivers bearing the never-failing tribute of the skies to the sea, yet not so thoroughly as to hinder enormous districts from remaining in a swamped and saturated condition, given up to the bogs, which even at the present time are said to cover nearly one-sixth of its surface. At first, nothing lived on Earth. It was a noisy, hot, scary place. Choking gas exploded from volcanoes and oceans of lava bubbled around the globe... Then in the deep, dark ocean, something amazing happened. This is an exciting and dramatic story about how life began and developed on Planet Earth, written especially for younger children. The authors explain how the first living cell was created, and how the cells multiply and create jellyfish and worms, and then fish with bendy necks, which drag themselves out of the water into swampy forests. They tell the story of the biggest creatures that have ever walked on land - the dinosaurs. Long after that, hairy creatures who have babies, not eggs, take over, stand on two legs and spread around the world, some of them living through cataclysmic events such as ice ages and volcanic eruptions. Everyone living today is related to these survivors. With delightful illustrations including lots of detail and humour, all carefully researched and checked, this book shows the development of life on Earth in a truly accessible and simple way. **CLICK HERE** to download Teachers' Notes specially written by the authors, Catherine Barr and Steve Williams, to assist teachers and librarians in the promotion and teaching of *The Story of Life* in schools and to help foster a love of good books, literature and reading in children. Reproduction of the original: *The Story of a Simple Soul* by H.G. Wells Our life is full of memories and thoughts about all the things that matter to us. There are only a few moments when we find something essential going on . A fear we have overcome, a dream that finally came true. But it is the little things that bring even more beauty with them. A hug of a friend on a bad day, the certainty that we are not alone when we sail right into the eye of trouble and the hope that, no matter how twisted our mind gets, we are only one smile away from the good times. The classic story of literature's most beloved elephant. After his mother is killed by a hunter, Babar avoids capture by escaping to the city, where he is befriended by the kindly Old Lady. Later, with cousins Celeste and Arthur, he returns to the great forest to be crowned King of the Elephants. With the original illustrations from Jean de Brunhoff's 1931 classic, this first Babar story has enchanted generations. From its misty beginnings as part of the mainland in the Stone Age, this history covers Lindisfarne's formation as an island, the Roman and Anglo-Saxon eras, the influence of Columba and Iona, Lindisfarne's own apostle, Bede and the monastic tradition, the coming of the Vikings, the Benedictine years and the dissolution of the monasteries. Anna Howard Shaw: *The Story of a Pioneer* is one of the classic autobiographies of American letters. A leader in the church as well as the suffrage movement, an M.D. as well as a powerful and eloquent lecturer, Anna Howard Shaw (1847-1919) was a close associate of Susan B. Anthony and the first woman to receive the United States Distinguished Service Medal. Born in England, Shaw immigrated to the United States as a child and in 1880 became the first woman ordained as a Methodist preacher. She subsequently left the pulpit to serve as president of the National American Suffrage Association--and later, as head of the Women's Committee of the Council of National Defense during World War I. Leontine T. C. Kelly was the first woman African American bishop in the United Methodist church. She retired in 1988. *The Heart of the Story* will help you see God's Word in a new and inspiring light. In the Bible's seemingly disconnected stories, you'll discover one grand, unfolding epic – God's story from Genesis onward – and your own life-story contained within it. "To understand the Bible," says author and pastor Randy Frazee, "you need bifocal lenses, because two perspectives are involved. The Lower Story, our story, is actually many stories of men and women interacting with God in the daily course of life. The Upper Story is God's story, the tale of his great, overarching purpose that fits all the individual stories together like panels in one unified mural." In this new edition, Randy dives deeper in the Upper and Lower stories and shows how both perspectives will open your eyes to the richness and relevance of the Bible. Illuminating God's master-plan from Genesis to our daily lives, *The Heart of the Story* will encourage you to experience the joy that comes from aligning your stories with God's. "The Young Trailers, a Story of early Kentucky" is a historical novel for children set in the American Old West by Joseph A. Altsheler, first published in 1907. The story is set to the backdrop of American Revolution and follows the adventures of a young boy, Henry, during his emigration from Virginia to Kentucky. The first novel in Altsheler's "The Young Trailers Series", it is a interesting adventure story set in an exciting chapter of American history. Joseph Alexander Altsheler (1862 – 1919) was an American journalist, editor and author famous for his of popular historical fiction aimed at children. Altsheler wrote a total of fifty-one novels during his life, as well as over fifty short stories. Other notable works by this author include: "The Sun of Saratoga, a romance of Burgoyne's

surrender" (1897) and "In Circling Camps, a romance of the Civil War" (1900). Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with a specially commissioned new introduction and biography of the author. Once upon a time Linus Torvalds was a skinny unknown, just another nerdy Helsinki techie who had been fooling around with computers since childhood. Then he wrote a groundbreaking operating system and distributed it via the Internet -- for free. Today Torvalds is an international folk hero. And his creation LINUX is used by over 12 million people as well as by companies such as IBM. Now, in a narrative that zips along with the speed of e-mail, Torvalds gives a history of his renegade software while candidly revealing the quirky mind of a genius. The result is an engrossing portrayal of a man with a revolutionary vision, who challenges our values and may change our world. A group of teens in a mountain town, during a late night prank, find suspicious activity in a local attraction. They realize recent mysterious deaths in the community trace back to what they discovered. Plagued with nightmares, visions, and unnerving coincidences, the teens struggle with alliances, beliefs and their own personal strengths and weaknesses while reality and love are redefined. Power couple Tanner and Heather, Nerd Brianna, True-hearted Bumbler Jack and Sensitive Jock Tristan aren't sure what they saw when they broke into a building in the mountains, but they are haunted by the experience. Murder and madness force the teens to act: will they be victims or victors? When Little Mole tries to find out who pooped on his head, the other animals show him how they poop in order to prove their innocence. One of Kirkus Review's Best Nonfiction Books of 2022 A deep-time history of animals and humans in North America, by the best-selling and award-winning author of Coyote America. In 1908, near Folsom, New Mexico, a cowboy discovered the remains of a herd of extinct giant bison. By examining flint points embedded in the bones, archeologists later determined that a band of humans had killed and butchered the animals 12,450 years ago. This discovery vastly expanded America's known human history but also revealed the long-standing danger Homo sapiens presented to the continent's evolutionary richness. Distinguished author Dan Flores's ambitious history chronicles the epoch in which humans and animals have coexisted in the "wild new world" of North America—a place shaped both by its own grand evolutionary forces and by momentous arrivals from Asia, Africa, and Europe. With portraits of iconic creatures such as mammoths, horses, wolves, and bison, Flores describes the evolution and historical ecology of North America like never before. The arrival of humans precipitated an extraordinary disruption of this teeming environment. Flores treats humans not as a species apart but as a new animal entering two continents that had never seen our likes before. He shows how our long past as carnivorous hunters helped us settle America, initially establishing a coast-to-coast culture that lasted longer than the present United States. But humanity's success had devastating consequences for other creatures. In telling this epic story, Flores traces the origins of today's "Sixth Extinction" to the spread of humans around the world; tracks the story of a hundred centuries of Native America; explains how Old World ideologies precipitated 400 years of market-driven slaughter that devastated so many ancient American species; and explores the decline and miraculous recovery of species in recent decades. In thrilling narrative style, informed by genomic science, evolutionary biology, and environmental history, Flores celebrates the astonishing bestiary that arose on our continent and introduces the complex human cultures and individuals who hastened its eradication, studied America's animals, and moved heaven and earth to rescue them. Eons in scope and continental in scale, Wild New World is a sweeping yet intimate Big History of the animal-human story in America. "6 autobiographical anecdotal column stories" in Expat-English and other European languages - I'm 44. A Xennial in the middle of life, who has known both the analog and digital world. COVID-19 as well as the war in Europe have only emphasised how important it is to build that bridge between today's generations. A physical "about me and yoU" combined with its digital version seems to me the perfect inclusive solution. Discusses the various aspects of the sea—from the many moods of the sea to the many people who depend upon it for their livelihood. A Kirkus Reviews Best Nonfiction Book of 2021 Family secrets emerge as a best-selling author dives into the history of the mob in small-town America. Best-selling author Russell Shorto, praised for his incisive works of narrative history, never thought to write about his own past. He grew up knowing his grandfather and namesake was a small-town mob boss but maintained an unspoken family vow of silence. Then an elderly relative prodded: You're a writer—what are you gonna do about the story? Smalltime is a mob story straight out of central casting—but with a difference, for the small-town mob, which stretched from Schenectady to Fresno, is a mostly unknown world. The location is the brawny postwar factory town of Johnstown, Pennsylvania. The setting is City Cigar, a storefront next to City Hall, behind which Russ and his brother-in-law, "Little Joe," operate a gambling empire and effectively run the town. Smalltime is a riveting American immigrant story that travels back to Risorgimento Sicily, to the ancient, dusty, hill-town home of Antonino Sciotto, the author's great-grandfather, who leaves his wife and children in grinding poverty for a new life—and wife—in a Pennsylvania mining town. It's a tale of Italian Americans living in squalor and prejudice, and of the rise of Russ, who, like thousands of other young men, created a copy of the American establishment that excluded him. Smalltime draws an intimate portrait of a mobster and his wife, sudden riches, and the toll a lawless life takes on one family. But Smalltime is something more. The author enlists his ailing father—Tony, the mobster's son—as his partner in the search for their troubled patriarch. As secrets are revealed and Tony's health deteriorates, the book become an urgent and intimate exploration of three generations of the American immigrant experience. Moving, wryly funny, and richly detailed, Smalltime is an irresistible memoir by a masterful writer of historical narrative. Thirteen-year-old Bani, though born in Jerusalem, has lived from infancy with his uncle in beautiful Susa, the city of the Persian King Artaxerxes. Now, his Uncle Nehemiah wants to leave his position of high honor as Cupbearer to the King to return to Jerusalem, a city in ruins and beset by every kind of trouble! Nehemiah's request of the king, permission to return to help his own people, could so easily—in an empire riddled with political intrigue—be misconstrued as treasonous scheming. Bani himself is given an unexpected part to play, the outcome of which is to forever change his life. Seen through the eyes of Bani, this novel dramatizes a turning-point of history, in 445 BC, when—through confrontation and daring risks—Judaism was re-established in the Promised Land, and purified for her unfolding mission. Papou had stories to tell that went unheard until his granddaughter decided to write this book. He was not a hero, he said. He was a boy. He didn't choose to fight this war. He was drafted. He was only 18, a recent high school graduate, a child, and somebody's son. This boy survived landing on Omaha Beach with his friends falling all around him. But on the morning of October 7, 1944, he was almost fatally injured by a bomb that landed on his tent. He learned how to walk again, and chose to go straight back to the front lines - because he felt that was where he should be, with his buddies. He came back only to find that he was one of the few in his unit who remained. This is a story of WWII. It's also a story of love, faith, courage and hope. This book is appropriate for elementary through high school and addresses the US History and Social Studies standard of The World and the US' Place in it; Conflicts between and among countries and people, US World History Sequence. Ein Buch das zeigt, wie sehr Frauen die Kunst prägen Wie viele Künstlerinnen kennen Sie? Wer schreibt letztendlich Kunstgeschichte? Haben Frauen vor dem 20. Jahrhundert überhaupt als Künstlerinnen gearbeitet? Bis in unsere Gegenwart hinein wirkt die Kunst, die über Jahrhunderte hinweg von Männern für Männer gemacht wurde – dieses Buch beweist, wie einseitig dieses Bild ist. Katy Hessel nimmt uns mit auf eine Reise durch die Epochen und zeigt, welch tiefgreifenden Einfluss Künstlerinnen über die Zeit hinweg hatten, welche Pionierarbeit sie häufig leisteten und wie sie verschiedene Stile, Techniken und Strömungen prägten. Entdecken Sie mit ihr viele Kunstformen, die oft übersehen oder abgetan werden, und zahlreiche aufregende Werke, die an der »Geschichte der Kunst« ebenfalls erheblichen Anteil hatten. So gibt die Autorin unbekanntes, vergessenes oder bislang unsichtbaren Künstlerinnen aus aller Welt die Bühne, die sie verdienen. In diesem Buch entdecken Sie die schillernde Sofonisba Anguissola der Renaissance, die bedeutendste italienische Malerin des Barock Artemisia Gentileschi, das radikale Werk von Harriet Powers in den USA des 19. Jahrhunderts und viele weitere außergewöhnliche Frauen, die bis auf wenige Ausnahmen wie Frida Kahlo oder Paula Modersohn-Becker bislang wenig beachtet wurden. Von der Küste Cornwalls bis Manhattan, von Nigeria bis Japan – dies ist die eine zeitgemäße Geschichte der Kunst. Eine Geschichte, bei der Frauen im Mittelpunkt stehen. Reproduction of the original. Edited and written by an international "who's who" of more than 100 authors, including anesthesiologists, nurse anesthetists, bench scientists, a surgeon, and representatives of industry, this text provides a comprehensive history of anesthesia, unique in its focus on the people and events that shaped the specialty around the world, particularly during the past 70 years when anesthesia emerged from empiricism and developed into a science-based practice. 'Overall, the text is very well written in a style that is precise yet easy to understand and interesting to follow ... It does not refer to scientific or other publications or suggest further reading, but is completely self-contained. This makes it highly accessible for non-experts. It is intended for 'serious readers with some general background knowledge in physics, although no specialist knowledge is required'. And it can indeed be recommended to any reader with a scientific interest in the subject, and also as a good recreational read for experts. This is even more true due to the excellent quality of the paper and the print, and the nice format and overall making of the book.'Contemporary PhysicsEach elementary particle contained within every known substance has an almost identical twin called its antiparticle. Existing data clearly indicate that equal numbers of particles and antiparticles were initially created soon after the birth of the universe. Despite this, all objects around us, as well as all the stars in all the known galaxies, are made of particles, while antiparticles have almost completely vanished. The reasons behind this disappearance are not yet fully known. Uncovering them will allow us to not only penetrate much deeper into the structure of matter, but also to understand the secret mechanisms that determine the genesis and development of our immense universe. That is why explaining the mystery of the missing antimatter is currently considered to be one of the main tasks of particle physics.This book tells the story of all the achievements in solving the problem of the missing antiparticles including the latest developments in the field. It is written by Prof. Guennadi Borissov, an international expert in this subject. It is intended for serious readers with some general background knowledge in physics, although no specialist knowledge is required. All phenomena observed in the microworld of particles are explained in simple terms using well-known examples from ordinary life. Starting with a description and discussion of the main properties of particles and antiparticles, the book details the important stages in the research that has brought scientists closer to solving one of the greatest enigmas of nature.
