Crack the Code and Get Fluent Faster! "I had to learn [a new language] in a handful of days for a TV interview. I asked Benny for help and his advice was invaluable." - Tim Ferriss What if you could skip the years of study and jump

right to speaking Italian? Sound crazy? No, it's language hacking. It's about learning what's indispensable, skipping what's not - and using what you've learned to have real conversations in Italian - from day one! Unlike most traditional language courses that try to teach you the rules of a language, Language Hacking Italian, shows you how to learn and speak Italian immediately through proven memory techniques, unconventional shortcuts and conversation strategies perfect by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. The Method Language Hacking takes a modern approach to language learning, blending the power of online social collaboration and the 80/20 principle of learning (Benny's ten #languagehacks show you how to achieve more with less!). It focuses on the conversations and language that learners need to master right away, rather than presenting language in the order of difficulty like most courses. This means you can start having conversations immediately. Course Features Each of the 10 units culminates with a speaking mission that you can choose to share on the italki Language Hacking learner community (www.italki.com/languagehacking) where you can give and get feedback and extend your learning beyond the pages of the book. The audio for this course is available for free on library.teachyourself.com or from the Teach Yourself Library app. You don't need to go abroad to learn a language any more.

This volume looks at ten private autobiographies by (in part) literate eyewitnesses from the First World War with little writing practice to examine semantic-cognitive (coherence) and grammatical-structural (cohesion) textual contexts. It asks to which extent writers who usually only communicated orally were able to coherently and cohesively create long, complex texts by utilizing the means of written language. When face-to-face with a real Italian speaker, do you freeze? Do you know how to ask for directions in Italian or communicate if there's an emergency? If your answer to any of the previous

questions was 'Yes', then this book is for you! If there's anything more challenging than learning the grammar rules of a new language, it's knowing what to say and having the courage to speak with confidence. We know how you feel - You always try to avoid making embarrassing mistakes or not getting your message through correctly, but it will happen anyway. 'How do I get out of this situation?', You may ask yourself, but have yet to find a straight-forward answer. Until now. Our Italian dialogues get straight to the point saving you precious time. There's no benefit learning words and phrases you will never actually use! If you want to learn Italian quickly and have a ton of fun along the way, obviously, this book is for you! How Conversational Italian Dialogues works:

- Each new chapter will have a fresh, new story between two or more people who wish to solve a common, day-to-day problem that you will most likely experience in real life.
- A Italian version of the conversation will take place first, followed by an English translation. This ensures that you fully understood just what it was that they were saying!
- Before and after the main section of the book, we shall provide you with an introduction and conclusion that will offer you important strategies, tips and tricks to allow you to get the absolute most out of this learning material.
- That's about it! Simple, useful and incredibly helpful; you will NOT need another conversational Italian book once you have started reading and studying this one!

-Focus on getting from zero to conversationally fluent, so you can:

- Travel or live in Italy or any Italian speaking country without relying on Google Translate
- Join Italian conversations with your Italian speaking coworkers, friends, or family members
- Date Italian-speakers without embarrassing yourself

In 1609, Galileo, then Professor of Mathematics at Padua, in the service of the Venetian Republic, heard from a correspondent at Paris of the invention of a telescope, and set to work to consider how such an instrument could be made. The result was his invention of the telescope known by his name, and identical in principle with the modern opera-glass. In a maritime and warlike State, the advantages to be expected from such an invention were immediately recognised, and Galileo was rewarded with a confirmation of his Professorship for life, and a handsome stipend, in recognition of his invention and construction of the first telescope seen at Venice. In his pamphlet, *The Sidereal Messenger*, here translated, Galileo relates how he came to learn the value of the telescope for astronomical research; and how his observations were rewarded by numerous

discoveries in rapid succession, and at length by that of Jupiter's satellites. Galileo at once saw the value of this discovery as bearing upon the establishment of the Copernican system of astronomy, which had met with slight acceptance, and indeed as yet had hardly any recommendation except that of greater simplicity. Kepler had just published at Prague his work on the planet Mars (*Commentaria de motibus Stellæ Martis*), on which he had been engaged apparently for eight years; there he heard of Galileo's discoveries, and at length was invited by Galileo himself, through a common friend, Giuliano de' Medici, ambassador of the Grand-Duke of Tuscany, Cosmo de' Medici II., to the Emperor Rudolph II., to correspond with Galileo on the subject of these discoveries. The Emperor also requested his opinion, and Kepler accordingly examined Galileo's *Sidereal Messenger* in a pamphlet, entitled *A Discussion with the Sidereal Messenger* (Florence, 1610). In this Discussion Kepler gives reasons for accepting Galileo's observations—although he was not able to verify them from want of a telescope—and entirely supports Galileo's views and conclusions, adducing his own previous speculations, or pointing out, as in the case of Galileo's idea of earth-light on the moon, the previous conception of the same explanation of the phenomenon. He rejects, however, Galileo's explanation of the copper colour of the moon in eclipses. Kepler ends by expressing unbounded enthusiasm at the discovery of Jupiter's satellites, and the argument it furnishes in support of the Copernican theory. Soon after, in 1611, Kepler published another pamphlet, his *Narrative*, giving an account of actual observations made in verification of Galileo's discoveries by himself and several friends, whose names he gives, with a telescope made by Galileo, and belonging to Ernest, Elector and Archbishop of Cologne. Kepler and his friends saw the lunar mountains and three of the satellites of Jupiter, but failed to make out any signs of the ring of Saturn corresponding to the imperfect description of Galileo.

Questo libro ci porta nel Bacino del Lago Ciad, nel cuore dell'Africa, e ci svela da vicino un ecosistema unico, fragile e prezioso, con la vita quotidiana delle persone che vi abitano. Negli ultimi quattro anni questo lago, il quarto per le dimensioni del continente africano, ha perso i tre quarti della sua estensione. Eppure, il lago pulsa di vita e circa 11 milioni di persone traggono da esso la loro esistenza. Il libro contiene oltre 350 fotografie di Marzio Marzot, informazioni documentate sui sistemi tradizionali di produzione alimentare, dettagli scientifici ed appunti di un viaggio attraverso una regione unica al mondo. Fornisce una visione approfondita della vita e delle abitudini degli agricoltori, dei pescatori e dei pastori che conservano ed utilizzano la biodiversità nei loro sistemi agricoli tradizionali, sfruttando l'esperienza e le tecniche apprese nel corso dei secoli."
