Crete offers an incredibly multifaceted realm for walkers. Many areas of the island are still rugged and pristine. The island's terrain is dominated by three mighty mountain ranges, furrowed by deep gorges. Lofty mountains and a deep-blue sea are in close proximity - an ideal

combination for any holiday. The finest coastal and mountain walks on Greece's largest and most diverse island can be found in the Rother Walking Guide »Crete«. The choice ranges from a pleasant walk across foothills through vineyards and sprawling groves of olive trees all the way up to the highest panoramic summits. There are even some demanding peaks, over 2000 metres in height, to climb. Breathtaking canyons can be traversed and isolated, dripstone caves are waiting to be explored. Everywhere you look, you'll find little villages, secluded monasteries and remote caves. Coastal trails lead to tranquil coves for bathing; is there anything better than, after a walk, taking a dip in some refreshing waters? Even the classic Cretan walks, like the Samaria Gorge and Dead's Gorge with its Minoan palace grounds, are included in this guide. Rolf Goetz, a seasoned writer of walking guides for the Bergverlag Rother, presents 70 walks on the island of Crete, all rich in diversity. Each individual walk includes a short preface with all the important key points, an exact description of the route, a pertinent height profile and a little walking map with the route marked in. Apart from these, there are many tips pertaining to the availability of refreshment, possible alternative routes as well as sites worth a visit. GPS tracks are available for downloading. Numerous delightful photos whet the appetite for making the island your first choice for your next holiday sojourn. An essential guide for Crete fans! Reproduction of the original: Aunt Crete's Emancipation by Grace Livingston Hill-Lutz This volume presents the primary archaeological report about the excavation of the Late Minoan I town of Gournia in eastern Crete, directed by Harriet Boyd Hawes at the beginning of the 20th century. This second edition presents exactly the same information and images as the first edition, but in a smaller, more user friendly format than the original elephantine book. Plans, pottery, and small finds among many other topics on the Bronze Age archaeology of eastern Crete are all included, just as in the first edition. At the outset of the Second World War on September 1, 1939, young Aussie diggers are rushed to assist Britain in its hour of need to the nearest European war zone in the Middle East and North Africa. My Uncle Arthur, young Arty is one of these a sapper with 6 years militia training as an army engineer. The ANZAC forces sweep through Libya, from Egypt to Benghazi, defeating superior numbers of heavily armed Italians the first Allied land victory of the war. Ill-equipped and lacking promised supplies, the ANZACs are then inappropriately redirected from North Africa to Greece to help the Greeks face the overwhelming German advance. Retreating to Crete, Arty is captured in the Battle of Crete and becomes a POW. I

am motivated to visit the conflict zones of Gallipoli and to follow my uncles wartime exploits from the time of his capture in June 1941 until his third and final escape from a German work camp in Czechoslovakia in 1945. Modern day travel makes it possible to visit not only the more recent wartime scenes of Central Europe, but also to visit the sites of classical civilizations to discover the history, art and cultures of the Mediterranean. Accompanying me on my journey is Avril who was born in England and has vivid wartime memories of the conflict from her childhood. A riveting account of the fall of Greece, the Battle of Crete, and the Cretan Resistance, from the beginning of World War II to its end. This book presents an archaeological study of Crete in transition from the Neolithic to the Early Bronze Age (c. 4000 to 3000 BC) within the broader South Aegean context. The study, based on the author's own fieldwork, contains a gazetteer of over 170 sites. The material from these sites will prompt archaeologists in Greece, Turkey, and the Middle East to reconsider their understanding of the foundation of Bronze Age civilization in the Aegean. First published in 2006. A rapid advance of Cretan studies in recent years is a measure of their importance for our understanding of the early history of European civilization. It is now generally recognized that the island of Crete played a part in this early history which is out of all proportion to its size. This book offers information on the social history: from early times until the Roman Occupation In 1941, after the conquest of Yugoslavia and Greece, senior German military leaders were considering two airborne operations, one for the invasion of Crete and the other for the invasion of Malta. The invasion of Crete was executed from 20 May to 1 June 1941 with heavy German losses. The invasion of Malta never took place even though the senior military leaders in the Oberkommando der Wehrmacht (OKW) recommended invading Malta over Crete because of its strategic importance, but were overridden by Adolf Hitler. A year later, while the North Africa campaign was being conducted, another invasion was planned for Malta, but within a few weeks of executing the plan it too was postponed and eventually cancelled. The primary focus of this research is to establish why in 1941 Crete was invaded, but Malta was not. The secondary focus is to establish why one year later a second planned invasion of Malta was rejected and abandoned, and what were the strategic repercussions of not invading Malta. The Axis never captured Malta, and the offensive capability of Malta was never destroyed, thus leading to the defeat of all Axis forces in North Africa. Leadership failures in the defense of Crete were essential factors contributing to Allied defeat on the island in May 1941. The Germans appeared unstoppable during the early stages of World War II. Inexperienced Allied forces were willing to fight, but the sentiment was the Germans were too powerful. Defeat became a foregone conclusion. To defend at all costs no longer appeared viable. Withdrawal and evacuation seemed almost commonplace in Allied strategy. Great Britain and Germany identified early in the war the strategic importance of the island of Crete for conducting military operations in the Mediterranean. Operationally the British maintained naval supremacy in the Mediterranean, while the German Luftwaffe ruled the skies. The Allies began defending Crete in November 1940. However, the Middle East Command put little effort into defending the island and changed Crete Force Commanders on a monthly basis. Allied intelligence uncovered the details of the German invasion plan for Crete. In a last ditch effort, forces evacuated from Greece were sent to Crete to bolster the defenses. This brought the total number of Allied defenders to 42,500 to repel an estimated enemy assault of 5,000 men. The German plan for the occupation of Crete, Operation MERCURY, called for gliders and Hitler's elite paratroops to conduct the largest airborne operation to date. The plan pitted 22,000 men and 1280 aircraft against an erroneously estimated enemy strength of 5,000 men. The success of this plan relied upon surprise and the paratroops securing one of the three airfields on the island so reinforcements could be flown in. A reluctant Crete Force Commander set the tone for subordinate commanders' leadership failures. The invasion began the morning of 20 May 1941. The Germans suffered heavy casualties. At the end of the first day of fighting, they were short ammunition, and the Allies maintained control of the airfields. However, the battalion commander defending the airfield at Maleme, lacking communications and situational awareness, was unaware of the success of his unit and that night mistakenly ordered its withdrawal from the airfield. The Germans occupied the airfield in the morning and reinforcements were flown in. The Allies conducted an attack the night of 21 May to retake the airfield, but poor Allied leadership at the Brigade and Division level resulted in failure. Consequently, the Germans were able to mass combat power on the island and defeat the Allies. The

defenders outnumbered the attackers nearly 2 to 1, knew the invasion plan, and established their defense accordingly. By all accounts, the Allies should have defeated the Germans and in fact came quite close to doing so. However, failures in Allied leadership afforded the Germans opportunities that were quickly exploited. Subsequently, they were able to defeat the Allies within 12 days. Failure in Allied leadership, not overwhelming German combat power, was responsible for the Allied defeat on Crete. Lonely Planet's Crete is your most up-to-date advice on what to see and skip, and what hidden discoveries await you. Stroll along Hania's Venetian Harbour, laze in Elafonisi's clear turquoise waters, and hike dazzling Samaria Gorge- all with your trusted travel companion. A two-volume account of a British scholar's travels through Crete while it was under Egyptian administration, published in 1837. Discover the rich history and culture of some of the world's most influential historical places with these highly illustrated books, packed with informative and enlightening descriptions and information Vrokastro remains one of the few Early Iron Age settlements excavated in Crete, and it is key to understanding the nature and history of regional settlement during this period. Volume I of the Vrokastro survey presents the first catalogue of the pottery excavated from the settlement and cemeteries by Edith Hall in 1910 and 1912, along with a brief analysis of metal objects from the town and its cemeteries and new profile drawings and photographs. This site is important for its size, long settlement history that includes both the Bronze and Early Iron Age, and its artifacts, which reveal a local pottery tradition and contacts with other areas of Crete and the Aegean. In addition, Vrokastro is the only completely excavated site within the survey boundaries, and is thus the type-site for the new systematic survey recently undertaken in this area. Barbara Hayden provides new insights concerning the chronology of the settlement and its tombs, the nature of occupation at the site over 500 years, and commentary on burial practices and techniques. She reviews the evidence for contacts with other areas in Crete and the Aegean. This publication will be of use to those interested in ceramics of the period, settlement patterns, history, trade, burial customs, and metalworking. Following the first two catalogues of the Cretan collection of the Museum's Mediterranean Section, its conclusions are an integral part of the overall Vrokastro regional survey. The air battle for Yugoslavia, Greece and Crete began in June 1940 with the Italian declaration of war. In the past, there has been much controversy amongst air historians on many of the details of the operations. It was here, for example, that "Pat" Pattie believed by many to be the Royal Air Force's "unknown" top-scoring fighter pilot of the whole war, saw most of his action. Just how many kills did he achieve and how? Taken from extensive research into available British, Italian and German records, and interviews and correspondence with survivors or relatives of those present, this book seeks to provide an accurate portrait of the air war for Yugoslavia, Greece and Crete from 1940-41. CD-ROM for vol. 2 includes Appendices 1-6 and the Vrokastro archaeological survey project. Crete has always attracted the interest of scholars in modern times not only because of the archaeological discoveries of Sir Arthur Evans, but also because of its rich history and the particular cultural traits and traditions resulting from the fact that the island has been at the centre of geographical, cultural and religious crossroads. The fifteen papers included in this volume explore original aspects of the Cretan cultural and historical tradition, give original insights into already established fields and underline from the vantage point of their own particular discipline its distinctive character and impact. As a result of such a thematic variety, this volume will be of interest not only to scholars and students of modern Greek studies, but also Renaissance Studies, comparative literature, cultural and social history and anthropology, and travel literature, as well as historical linguistics and dialectology. When Venice conquered Crete in the early thirteenth century, a significant population of Jews lived in the capital and main port city of Candia. This community grew, diversified, and flourished both culturally and economically throughout the period of Venetian rule, and although it adhered to traditional Jewish ways of life, the community also readily engaged with the broader population and the island's Venetian colonial government. In *Colonial Justice and the Jews of Venetian Crete*, Rena N. Lauer tells the story of this unusual and little-known community through the lens of its flexible use of the legal systems at its disposal. Grounding the book in richly detailed studies of individuals and judicial cases—concerning matters as prosaic as taxation and as dramatic as bigamy and murder—Lauer brings the Jews of Candia vibrantly to life. Despite general rabbinic disapproval of such behavior elsewhere in medieval Europe, Crete's Jews regularly turned not only to their own religious courts but also to the secular Venetian judicial

system. There they aired disputes between family members, business partners, spouses, and even the leaders of their community. And with their use of secular justice as both symptom and cause, Lauer contends, Crete's Jews grew more open and flexible, confident in their identity and experiencing little of the anti-Judaism increasingly suffered by their coreligionists in Western Europe. Daily life and living conditions in the Byzantine world are relatively underexplored subjects, often neglected in comparison with more visible aspects of Byzantine culture, such as works of art. The book is among the few publications on Greek Byzantine populations and helps pioneer a new approach to the subject, opening a window on health status and dietary patterns through the lens of bioarchaeological research. Drawing on a diversity of disciplines (biology, chemistry, archaeology and history), the author focuses on the complex interaction between physiology, culture and the environment in Byzantine populations from Crete in the 7th to 12th centuries. The systematic analysis and interpretation of the mortality profiles, the observed pathological conditions, and of the chemical data, all set in the cultural context of the era, brings new evidence to bear on the reconstruction of living conditions in Byzantine Crete. Individual chapters look at the demographic profiles and mortality patterns of adult and non-adult populations, and study dietary habits and breastfeeding and weaning patterns. In addition, this book provides an indispensable body of primary data for future research in these fields, and so furthers an interdisciplinary approach in tracing the health of the past populations. Writing on Crete, the fourth and last book of the Freewheeling series, opens on Emery, having departed Spain alone, making his way to Grez-sur-Loing, France, where he learns the George Sand Bookshop proprietor Walt Lowen has something he wants his vagabond friend to do for him. It involves Emery's traveling to Crete on Lowen's behalf and, at his expense, writing back to him up close about certain vague, intriguing things apparently going on there, in which Lowen, even from his distance, has somehow got himself entangled. "Old Lowen got Emery a flight out of Paris on a 1-300 B4 plane seating 315 people. The plane was soon twelve meters up, flying 870 kilometers an hour, passing over the snow covered Austrian Alps, next flying over Yugoslavia, then Albania, and on to Athens where luminous, delicious oranges were being sold on bleak, ashen streets. The grim city was surrounded on three sides by rough mountains - Mount Parnitha, Mount Penteli, and Mount Hymettos. At the core of the congested city was Plaka. In Plaka there were cheap flop houses with communal bedding for half a dollar, where local wines cost seven cents a glass. "In the morning, Emery took a bus to Piraeus on the Saronic Gulf, hidden by clouds. He enjoyed early morning coffee at a harbor front cafe. Black-haired, brown-eyed sailors in green uniforms stood idly about. Emery had evening tickets for Heraklion, and so had time to kill. He'd be on the ferry traveling overnight to Heraklion. He walked to the town center. He ate bread and Feta cheese. It was very cloudy, very chilly. Back at the docks in the evening, he boarded the ferry, the Knossos. A comprehensive account of the Palaces, control networks and spatial dynamics of Neopalatial Crete, the flourish of the Minoan civilization. Early Minoan Crete is re-envisioned as a space of social innovation, in which change occurred through people and objects. This book makes a compelling case for a matriarchal Bronze Age Crete. It is acknowledged that the preeminent deity was a Female Divine, and that women played a major role in Cretan society, but there is a lively, ongoing debate regarding the centrality of women in Bronze Age Crete. a gap in the scholarly literature which this book seeks to fill. Reprint of the original, first published in 1865. An in-depth study of the Late Minoan IA cross-draft kiln found in excavations at Kommos, Crete. The kiln is of a type popular during the Neopalatial period, and its good state of preservation has allowed the authors to speculate about its original internal layout and use, as well as about the roof that covered it. Much of the large quantity of pottery found associated with the kiln is analyzed in detail, allowing for the first time the study of the shapes, decoration, and technical characteristics of vases known to have been fired in a specific LM IA kiln. The book presents an integrated program of analytical techniques used to illustrate the range of firing temperatures, the compositional similarities and differences in the clays used, and aspects of the firing process and the upper kiln structure. Offered here is a valuable contribution to our knowledge of the technology and organization of ceramic production at the beginning of the Late Minoan period, which will form a basis for studies of pottery provenience and exchange. DK is the world's leading illustrated reference publisher, producing beautifully designed books for adults and children in over 120 countries. The bestselling author of *The Battle of Arnhem* and *D-Day* vividly reconstructs the epic WWII struggle for Crete - reissued with a new introduction Nazi Germany expected its airborne attack on Crete in 1941 to be a textbook victory based on tactical surprise. Little did they know that the British, using Ultra intercepts, had already laid a careful trap. It should have been the first German defeat of the war when a fatal misunderstanding turned the battle around. Prize-winning historian and bestselling author Antony Beevor lends his gift for storytelling to this important conflict, showing not only how the situation turned bad for Allied forces, but also how ferocious Cretan freedom fighters mounted a heroic resistance. Originally published in 1991, *Crete 1941* is a breathtaking account of a momentous battle of World War II. Lists and annotates some 380 books, journal articles, conference papers, and other sources of information on Crete, focusing on both history and contemporary life. Most works described are in English, with a few in other languages. Only material published since the mid- 19th century has been included, with a heavy bias towards the late 20th century. Annotation copyrighted by Book News, Inc., Portland, OR "His keen understanding of history and legend...illuminate[s] his visits." —Publishers Weekly "A vivid picture of the island." —Associated Press "It is hard to think of anywhere on earth where so many firsts and mosts are crammed into a space so small," Barry Unsworth writes of the isle of Crete. Birthplace of the Greek god Zeus, the Greek alphabet, and the first Greek laws, as well as the home of 15 mountain ranges and the longest gorge in Europe, this land is indisputably unique. And since ancient times, its inhabitants have maintained an astonishing tenacity and sense of national identity, even as they suffered conquest and occupation by Romans, Byzantines, Arabs, Venetians, Ottoman Turks, and Germans. Throughout this evocative book, now in trade paper,

Unsworth describes the incredible physical and cultural proportions of the island—in history, myth, and reality. Moving and artful, Crete gives readers a comprehensive picture and rich understanding of this complex—and indeed, almost magical—world of Mediterranean wonders. With the same keen eye and clear, eloquent prose that distinguishes his acclaimed historical novels, Barry Unsworth delivers his readers a two-fold traveler's reward, at once a wonderfully detailed panorama of

Crete's many layers of history and an evocative portrait of an island almost literally larger than life.
