The 2008 economic crisis called into question the sustainability of the individualistic consumer society. However, for better or for worse, this long-term crisis represents an opportunity for

the creation of a new model of growth to reform capitalism, structurally as well as culturally. As a contribution to this debate, Social Generativity offers a much-needed and original conceptual synthesis, within a unique anthropological focus on the forms of selfhood sustained by the historical and economic conditions of the present day. Encompassing four years of interdisciplinary empirical research based primarily on a sample of social groups, organizations and firms in Italy, this volume redefines the notion of "Social Generativity" from its psychological origin (as formulated by Erik Erikson) to that of a social action that can be implemented during daily life and in different spheres of existence. A critical analysis of contemporary capitalism, this volume will appeal to postgraduate students and policy makers interested in fields such as Organisational Studies, Anthropological Theory, Social Change, Economic Sociology, Public Affairs and Business Ethics. Francesco Bianchini gehört zu den

herausragenden Gestalten der europäischen gelehrten Welt am Beginn des 18. Jahrhunderts. Sein wissenschaftliches Werk reicht von astronomischen Schriften über eine unvollendete *Istoria universale* bis zur aufwendigen Publikation archäologischer Ausgrabungen. Als Ehrenmitglied der königlichen Akademien in Paris und London korrespondierte er mit den führenden Gelehrten seiner Zeit, so mit Leibniz und Newton. Die weitverzweigten Forschungsinteressen Bianchinis eröffnen ein Panorama frühneuzeitlicher Bildungs-, Wissenschafts- und Institutionengeschichte. Sein Leben und Werk fügen sich in die erkenntnis-, wahrnehmungs- und wissenschaftstheoretischen Kontroversen und forschungspraktischen Errungenschaften seiner Zeit ein. Er propagierte die Überlegenheit der Bild- über die Schriftquellen sowohl im Sinne der historischen Wahrheitsfindung als auch hinsichtlich der aus der Antike abgeleiteten Gedächtnis- und Wahrnehmungstheorien. Neben

der Forschung galt seine Aufmerksamkeit der Vermittlung von Wissen, bei der das Bild sowohl als eigenständiger Beleg wie als mnemotechnische Stütze von zentraler Bedeutung ist. Trotz dieses ungewöhnlich breit gefächerten Lebenswerkes, seiner weitreichenden Anerkennung zu Lebzeiten und einer hervorragenden archivalischen Überlieferung blieb Bianchini bisher in den jüngeren Forschungen zur Wissenschafts- und Kulturgeschichte des frühen 18. Jahrhunderts weitgehend ausgespart. Diese Lücke sollte ein international und überdisziplinär konzipiertes Kolloquium zumindest teilweise schließen, das im September 2003 am Institut für Europäische Kulturgeschichte in Augsburg stattfand und dessen Beiträge in dem vorgestellten Band dokumentiert werden. Thomas. *The Years of Alienation in Italy* offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades. *Un libro per bambini con stupende illustrazioni. Sono (ancora!) un ragazzino e vi racconterò la settimana prima del mio grande giorno. Di come me la passo a casa e a scuola. Vi racconterò*

della mamma, del perché il papà non vive più con noi e del fatto che devo sempre finire il mio piatto prima di alzarmi da tavola. Del perché voglio tanto bene alla Duffi e al maestro Hibschenberger, di Jule la chic e di Bernd il ciccione (come puzza!). Che cosa mi piace un sacco oppure che cosa non capisco per niente. Chi mi fa arrabbiare e chi invece mi manca un po' tanto. E del mio futuro. Mi ritrovo ancora una volta davanti alla porta di classe chiusa. Espulso un'altra volta. Quando poi dovevo solo starnutire. Rimuginò su questo e quello. Batteri, g'nzola, conigli nani, problemi di energia... Ma più che altro penso al mio grande giorno. This book examines the idea of organism in the work of Louis I. Kahn, from the turning point of Rome to the project for Venice. It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career, when he was working on a particular design method based on an entirely novel way of interacting with the past. Beginning with a meticulous

documentation and analysis of Kahn's experiences in the twenty years from 1930 to 1950, the book sheds new light on the relationship between Kahn's work and the modern movement. The arguments are supported by case studies, including that of the Palazzo dei Congressi in Venice based on Kahn's words (like his lessons in Venice at IUA, International University of Art, in 1971) and others as the Trenton Bath House, the Salk Institute (La Jolla), the Kimbell Museum (Fort Worth), the Yale Gallery and the Mellon Center for British Art (New Haven) and more. Unlike much of the by now well-established literature on Kahn's work, Louis I. Kahn in Rome and Venice suggests that the basic premise of Kahn's invention is the idea of spatial, constructive organism, which explains how he created forms that were inextricably anchored in the past, without imitating any one kind of ancient architecture. The main objective of the book is to explain Kahn's methodology to architects and

students, showing how he was able to design an architectural object with the characteristics of the best designed objects: organisms, in which each part contributes, with the whole, to creating "something made of indivisible parts". "La nuova economia che immaginiamo contribuisce al progresso materiale e accompagna l'individuo mentre perfeziona la propria personalità e le proprie vocazioni. E tuttavia non impedisce di volgere l'animo verso una meta più alta, non un fine individuale o un profitto personale, ma un contributo alla vita di tutti sul cammino della civiltà." I due discorsi contenuti in questo quarto volume della collana Humana Civilitas rappresentano il proseguimento ideale alle uscite precedenti, successi di pubblico e di critica. Qui Adriano Olivetti si rivolge prima ai lavoratori di Ivrea, interrogandosi in un linguaggio straordinariamente partecipato, su quale debba essere il senso profondo del lavoro umano; poi affronta, nel secondo discorso che compone il

volume, le forme e i modi per rendere la fabbrica un bene di tutta la comunità, illustrando così il compimento teorico della sua riflessione su come trasformare il mondo produttivo e l'economia in strumenti di solidarietà per realizzare un'autentica giustizia sociale. Unveränderter Nachdruck der Originalausgabe von 1861. AUFSTIEG UND NIEDERGANG DER RÖMISCHEN WELT (ANRW) ist ein internationales Gemeinschaftswerk historischer Wissenschaften. Seine Aufgabe besteht darin, alle wichtigen Aspekte der antiken römischen Welt sowie ihres Fortwirkens und Nachlebens in Mittelalter und Neuzeit nach dem gegenwärtigen Stand der Forschung in Einzelbeiträgen zu behandeln. Das Werk ist in 3 Teile gegliedert: I. Von den Anfängen Roms bis zum Ausgang der Republik II. Principat III. Spätantike Jeder der drei Teile umfaßt sechs systematische Rubriken, zwischen denen es vielfache Überschneidungen gibt: 1. Politische Geschichte, 2. Recht, 3. Religion, 4. Sprache und

Literatur, 5. Philosophie und Wissenschaften, 6. Künste. ANRW ist ein handbuchartiges Übersichtswerk zu den römischen Studien im weitesten Sinne, mit Einschluß der Rezeptions- und Wirkungsgeschichte bis in die Gegenwart. Bei den Beiträgen handelt es sich entweder um zusammenfassende Darstellungen mit Bibliographie oder um Problem- und Forschungsberichte bzw. thematisch breit angelegte exemplarische Untersuchungen. Die Artikel erscheinen in deutscher, englischer, französischer oder italienischer Sprache. Zum Mitarbeiterstab gehören rund 1000 Gelehrte aus 35 Ländern. Der Vielfalt der Themen entsprechend gehören die Autoren hauptsächlich folgenden Fachrichtungen an: Alte, Mittelalterliche und Neue Geschichte; Byzantinistik, Slavistik; Klassische, Mittellateinische, Romanische und Orientalische Philologie; Klassische, Orientalische und Christliche Archäologie und Kunstgeschichte; Rechtswissenschaft; Religionswissenschaft und

Theologie, besonders Kirchengeschichte und Patristik. In Vorbereitung sind: Teil II, Bd. 26,4: Religion - Vorkonstantinisches Christentum: Neues Testament - Sachthemen, Fortsetzung Teil II, Bd. 37,4: Wissenschaften: Medizin und Biologie, Fortsetzung. Informationen zum Projekt und eine Übersicht über den Inhalt der einzelnen Bände finden Sie im Internet unter: <http://www.bu.edu/ict/anrw/index.html> Ferner gibt es eine Suchmaschine für die Stichwortsuche im Inhaltsverzeichnis aller bisher erschienenen Bände: <http://www.uky.edu/ArtsSciences/Classics/biblio/anrw.html> English summary: During the pontificate of the Medici Pope Leo X, a political and cultural highlight of the Renaissance, the close connections between the Medici and France were of vital importance. In the interdisciplinary approach taken in this book, researchers in the fields of history as well as the history of art and music examine the fundamental elements of this relationship in its

common context. German description: Der Pontifikat des Medici-Papstes Leo X. (1513-1521) war von weltpolitischer Bedeutung und stellt auch kulturell einen Höhepunkt der Renaissance dar. Dieser zwar kunsthistorisch intensiv, historisch aber kaum erforschte Pontifikat war wesentlich von den Frankreich-Bindungen des Medici und seiner Familie geprägt. Dabei wurden politische, wirtschaftliche, kulturelle und personale Interessen beider Seiten untrennbar miteinander verflochten. Dieses Faktum wird in dem vorliegenden Tagungsband erstmals interdisziplinär von Historikern, Kunsthistorikern und Musikhistorikern untersucht. Der Reiz und Ertrag des Bandes liegt darin, dass viele der früher meist isoliert betrachteten Phänomene - wenn sie überhaupt ins Blickfeld der Forschung gerieten - nun in einem umfassenden Kontext erscheinen und damit in neuen Zusammenhängen interpretiert und erklärt werden können. The book interprets

and recombines, within a subjective trajectory, some roots, pathways and conceptual frames of the planning thought that worked either as dissenting imaginations or generative source to critically question the modernist epistemologies. 'Critical planning and design' is presented in this book as a field of research inspired by critical urban theory and developed along with ideas and theories that prove to be radical, alternative, dialectical to the mainstream history of planning. In this book, scholars present what they consider as the most important books in the field of planning, public policy and design. They have been asked to write about a book and its author, in their preferred manner. This freedom allowed passionate and original contributions. Three main threads - the three parts of the book - shape the choices of the authors. The first concerns the reconstruction of some genealogical roots of planning (including Cerdà, Yona Friedman, Alberto Magnaghi, and Ian McHarg). The second thread groups the authors

who dialogue with contemporary protagonists of the planning debate (including John Friedmann, Leonie Sandercock, Doreen Massey, David Harvey, Tom Sievert, and Patzy Healey). The third thread includes authors who dig into relevant writings in social and philosophical sciences (including Max Weber, Charles Lindblom, Henri Lefebvre, Gilles Deleuze & Félix Guattari, Georges Didi-Huberman, Robert Nozick, and Karl Marx). The book is addressed to researchers of planning and urban studies, who value the critical re-reading of some fundamental books. Including thoughtful and critical arguments on influential thinkers of the past two centuries, the book will enable students, scholars and researchers of planning, design, political science, geographical, environmental, and urban studies to better understand the socio-spatial and ecological transformations under the contemporary transition while relying on a “usable past”. The book is also addressed to a wider audience of

readers interested in the problems of the city and space. Great stories, great science, and great practical advice about how, when, and why to break the rules' - Angela Duckworth, international bestselling author of Grit. Do you want to follow a script — or write your own story? Award-winning Harvard Business School professor Francesca Gino shows us why the most successful among us break the rules, and how rebellion brings joy and meaning into our lives. Rebels have a bad reputation. We think of them as troublemakers, outcasts, contrarians: those colleagues, friends, and family members who complicate seemingly straightforward decisions, create chaos, and disagree when everyone else is in agreement. But in truth, rebels are also those among us who change the world for the better with their unconventional outlooks. Instead of clinging to what is safe and familiar, and falling back on routines and tradition, rebels defy the status quo. They are masters of innovation and reinvention, and they have a lot

to teach us. Francesca Gino, a behavioral scientist and professor at Harvard Business School, has spent more than a decade studying rebels at organizations around the world, from high-end boutiques in Italy's fashion capital, to the World's Best Restaurant, to a thriving fast food chain, to an award-winning computer animation studio. In her work, she has identified leaders and employees who exemplify "rebel talent," and whose examples we can all learn to embrace. Gino argues that the future belongs to the rebel — and that there's a rebel in each of us. We live in turbulent times, when competition is fierce, reputations are easily tarnished on social media, and the world is more divided than ever before. In this cutthroat environment, cultivating rebel talent is what allows businesses to evolve and to prosper. And rebellion has an added benefit beyond the workplace: it leads to a more vital, engaged, and fulfilling life. Whether you want to inspire others to action, build a business, or build more meaningful

relationships, Rebel Talent will show you how to succeed — by breaking all the rules. The idea of Utopia springs from a natural desire of transformation, of evolution pertaining to humankind and, therefore, one can find expressions of "utopian" desire in every civilization. Having to do explicitly with human condition, Utopia accompanies closely cultural evolution, almost as a symbiotic organism. Maintaining its roots deeply attached to ancient myths, utopian expression followed, and sometimes preceded cultural transformation. Through the next almost five hundred pages (virtually one for each year since Utopia was published) researchers in the fields of Architecture and Urbanism, Arts and Humanities present the results of their studies within the different areas of expertise under the umbrella of Utopia. Past, present, and future come together in one book. They do not offer their readers any golden key. Many questions will remain unanswered, as they should. The texts

presented in Proportion Harmonies and Identities - UTOPIA(S) WORLDS AND FRONTIERS OF THE IMAGINARY were compiled with the intent to establish a platform for the presentation, interaction and dissemination of researches. It aims also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different utopian visions and readings relevant to the arts, sciences and humanities and their importance and benefits for the community at large.
