Referierendes Organ für das Gesamtgebiet der Botanik. The olive (*Olea europaea*) is increasingly recognized as a crop of great economic and health importance world-wide. Olive growing in Italy is very important, but there is still a high degree of confusion regarding the genetic identity of cultivars. This book is a source of recently accumulated information on olive trees and on olive oil industry. The objective of this book is to provide knowledge which is appropriate for students, scientists, both experienced and inexperienced horticulturists and, in general, for anyone wishing to acquire knowledge and experience of olive cultivation to increase productivity and improve product quality. The book is divided into two parts: I) the olive cultivation, table olive and olive oil industry in Italy and II) Italian catalogue of olive varieties. All chapters have been written by renowned professionals working on olive cultivation, table olives and olive oil production and related disciplines. Part I covers all aspects of olive fruit production, from site selection, recommended varieties, pest and disease control, to primary and secondary processing. Part II contains the chapter on the description of Italian olive varieties. It is well illustrated and includes 200 elaiographic cards with colour photos, graphs and tables. Reprint of the original, first published in 1866. Mit dt., franz. und ital. Zusammenfass. Consists of Bulletin of agricultural science and practice (formerly International review of the science and practice of agriculture), Bulletin of agricultural economics and sociology (formerly International review of agricultural economics), International bulletin of plant protection (except issues for 1929-30) and Crop report and statistics (except issues for 1927-28). All four parts are also issued separately.
