The work is widely accepted as one of the most important studies trying to clarify the difficult perceptions of policy of reform and opening up that was formulated and implemented in the early 1980s in China. Professor Li Qiang is one of the leading sociologists in China. The author focuses on the history, current relevance, and impact of domestic national service. She argues that only by examining programs over time can we understand national service's successes and limitations, both in terms of its political support and its civic lessons. Through extensive archival and documentary research, supplemented with interviews, this is the first detailed policy history of VISTA and AmeriCorps and of America's main national service programs taken together as a whole. It furthers our understanding of twentieth-century American political development by comparing programs founded during three distinct political eras -- the New Deal, the Great Society, and the early Clinton years -- and tracing them over time. To a remarkable extent, the CCC, VISTA, and AmeriCorps reflect the policymaking ethos and political controversies of their times, illuminating principles that hold well beyond the field of national service and here, the author expertly evaluates the civic effects of national service policy in the context of political development in the United States. At the same time, by emphasizing the programs' effects on citizenship and civic engagement, this volume deepens our understanding of how programs can act as public policy for democracy. Civics education is "on the books" in all 50 states, yet civic illiteracy is widespread. Only one third of 12th graders are able to explain the significance of the Declaration of Independence, and fewer than half of 8th graders know the purpose of the Bill of Rights. This instructional guide explores the foundations of civics education--and the reasons for its demise--with commentary from civics education leaders and scholars across the nation. Questions for eliciting civics discussion are provided for all grade levels, along with detailed civic action and service projects and reading plans. Best practices and grant writing options are included. The author argues for a return to early 20th century civics education and details the traditional and present-day role of America's libraries in developing a civic-minded populace. School and public librarians are urged to utilize trade books and carefully evaluated websites to integrate civics within educational and youth services offerings. This new Vault guide provides an inside look at the opportunities available in government, public affairs, and politics in the nation's capital.

Terrorism, ethnocentrism, religious tension, competition over limited resources, war - these are just a few of the problems and challenges that have emerged in today's global economy. Globalization both implies and requires economic interdependence; and this should bring with it a heightened sense of the interconnectedness of the participating societies. But unfortunately, as recent events indicate, rather than our having formed a global community, today's society is more fragmented than ever. In light of this, education faces some formidable new challenges. How do we prepare future citizens for the world they will live in? How do we teach future generations to embrace the paradox of accepting the value of multiculturalism despite the conflicts it has produced? How do we instill religious tolerance in a time when fundamentalism has become inextricably tied with terrorism? How do we promote economic growth in the face of overpopulation and its depletion of resources? The authors of this collection of essays explore these and related challenges, and they suggest some novel ways of dealing with them.

"[Kennan] comes to us...as ambassador of a generation nearly gone and a conservatism so responsible, dutiful and so long extinct it may look revolutionary....As ever, Kennan in the present book has fulfilled his responsibility admirably." —Chicago Tribune "I have attempted to take the high ground," writes George F. Kennan in the foreword to this illuminating work, "trying to stick to the broader dimensions of things—the ones that would still be visible and significant in future decades." Against the background of a century of wars, revolution, and uneasy peace, Mr. Kennan advances his thoughts on a broad front: how the individual's quest for power can transform a government into a confusion of ambition, rivalry, and suspicion; how a nation's size can create barriers between the rulers and the ruled; why America must first set its own house in order before it can become a beacon to others. Deeply aware of the pressures under which public officials must act, Mr. Kennan sees a government in Washington that is forced to make decisions on issues of the moment, often without regard for long-term consequences. Neither the legislature, responsive to the interests of a narrow constituency, nor the executive branch, swamped by urgent problems at home and abroad, has the time or inclination to look far beyond the next election. Lost entirely is a vital element in any democracy: deliberation based upon study, review, and judgment. To address problems that defy quick political solutions, Mr. Kennan here boldly lays down a blueprint for a Council of State, a nonpolitical, permanent advisory board that would stand alongside yet apart from government policy makers, with the prestige to be heard "above the cacophony of political ambitions." Rich in historical example, this volume is a brilliant summing up of the experience and thought of the man the Atlantic described in a cover story entitled "The Last Wise Man" as: "diplomat, scholar, writer of rare literary gifts, one of most remarkable Americans of this century." *A Government Out of Sight* revises our understanding of the ways in which Americans turned to the national government throughout the nineteenth century.
