Guide Designing Cisco Network Service Architectures (ARCH) Second Edition
Foundation learning for ARCH exam 642-873
Keith Hutton Mark Schofield Diane Teare
Designing Cisco Network Service Architectures (ARCH), Second Edition, is a Cisco®-authorized, self-paced learning tool for CCDP® foundation learning. This book provides you with knowledge of the latest developments in network design and technologies, including network infrastructure, intelligent network services, and converged network solutions. By reading this book, you will gain a thorough understanding of issues and considerations for fundamental infrastructure services, including security, network management, QoS, high availability, bandwidth use optimization through IP multicasting, and design architectures for network solutions such as voice over WLAN and e-commerce. Whether you are preparing for CCDP certification or simply want to gain a better understanding of modular campus and edge network design and strategic solutions for enterprise networks such as storage area networking, virtual private networking, advanced addressing and routing, and data centers, you will benefit from the foundation information presented in this book. Designing Cisco Network Service Architectures (ARCH), Second Edition, is part of a recommended learning path from Cisco that includes simulation and hands-on training from authorized Cisco Learning Partners and self-study products from Cisco Press. To find out more about instructor-led training, e-learning, and hands-on instruction offered by authorized Cisco Learning Partners worldwide, please visit www.cisco.com/go/authorizedtraining. Keith Hutton is a lead architect for Bell Canada in the enterprise customer space. Keith still retains his certified Cisco instructor accreditation, as well as the CCDP, CCNP®, and CCIP® certifications. Mark Schofield has been a network architect at Bell Canada for the past six years. During the past five years, he has been involved in the design, implementation, and planning of large national networks for Bell Canada's federal government customers. Diane Teare is a professional in the networking, training, project management, and e-learning fields. She has more than 20 years of experience in designing,

implementing, and troubleshooting network hardware and software, and has been involved in teaching, course design, and project management. Learn about the Cisco SONA framework, enterprise campus architecture, and PPDIIO network life-cycle approach Review high availability designs and implement optimal redundancy Plan scalable EIGRP, OSPF, and BGP designs Implement advanced WAN services Evaluate design considerations in the data center core, aggregation, and access layers Design storage area networks (SANs) and extend the SAN with various protocols Design and tune an integrated e-commerce architecture Integrate firewall, NAC, and intrusion detection/prevention into your network design Design IPsec and SSL remote access VPNs Deploy IP multicast and multicast routing Incorporate voice over WLAN in the enterprise network Utilize the network management capabilities inherent in Cisco IOS® software This volume is in the Certification Self-Study Series offered by Cisco Press®. Books in this series provide officially developed self-study solutions to help networking professionals understand technology implementations and prepare for the Cisco Career Certifications examinations. subjects you need to study. It provides hundreds
of questions and answers in the subjects likely to
be covered on your upcoming exam, including
but not limited to: social services and welfare;
educating and interacting with the public;
supervision; preparing written material; and
more. IT services are prevalent throughout
virtually all businesses. Most enterprises and
many government functions are totally
dependent upon reliable and responsive IT
services to underpin vital business, community
and social functions. IT services have become
mainstream and managing them to deliver value
it the core message of ITIL V3, and the emphasis

in ITIL V3 on service catalogue management is a
direct result of the growing requirement for
business and IT to work together sharing data,
information and knowledge about demand for
services, service capabilities and patterns of
business activity. The Service Catalogue
Management process is now a very important
management field complete with its own
terminology and vital concepts. This study guide
outlines the concepts and principles underlying
the service catalogue; discusses a project plan
approach and reporting considerations;
describes the value of a sound business case and
the key relationships and touch points in the
service catalogue management process. Master
