First published in 1995, Surface Analysis of Paper examines surface analysis techniques from a paper industry perspective and places heavy emphasis on applications. Modern techniques, including ion mass spectrometry, infrared spectroscopy, and optical profilometry are reviewed in a straightforward manner. This new book provides details on widely used methods and instruments, and discusses how they can be used to attain, for example, contour maps of the microscopic constituents on paper surfaces and accurate analyses of the physical properties of paper. Organized into three sections, Surface Analysis of Paper provides thorough coverage of the physical characteristics of paper, and a clear picture of new and emerging analytical methods. Carefully chosen background material on fundamental concepts is included wherever such material assists in understanding the uses of analysis methods. Each chapter contains: An introduction A description of the technique A discussion of the type of information that can be obtained with the particular technique Practical examples to demonstrate the advantages of the technique NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available. Good, No Highlights, No Markup, all pages are intact, Slight Shelfwear, may have the corners slightly dented, may have slight color changes/slightly damaged spine. The proceedings from the 1999 TMS Annual Meeting & Exhibition describe and discuss current practice and problems in the analysis of ores and process products in the minerals industry, including those related to environmental concerns. An der Analysis kommen Sie nicht vorbei: Sei es nun in der Schule oder wenn Sie Natur-, Ingenieurs-, oder Wirtschaftswissenschaften studieren. Dieses Buch hilft Ihnen, wenn Sie sich einen schnellen Überblick über das Thema verschaffen wollen. Mark Ryan erklärt Ihnen leicht verständlich, was Sie über Grenzwerte und Funktionen unbedingt wissen sollten. So ist dies Ihr perfekter Nachhilfelehrer für die Tasche: freundlich, kompetent, günstig. Modern computer technology has opened up several new possibilities for optimizing the administration of educational and psychological tests. In computer adaptive testing (CAT), tests are automatically tailored to the proficiency level of the individual examinees. Currently, nearly all large-scale testing programs in the western world are already adaptive or in the process of becoming so. Written by active CAT researchers from Europe and North America, the chapters offer a comprehensive introduction to the latest developments in the theory and practice of CAT. The book can be used both as a basic reference on the state of the art in CAT and a valuable resource in graduate courses on test theory. The theoretical chapters in this book cover such topics as item selection and ability estimation, item pool development and maintenance, item calibration and model fit, and testlet-based adaptive testing. The practical chapters describe the operational aspects of existing large-scale CAT programs. The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research achievements with each other. It has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority. Click on the Supplements tab above for further details on the different versions of SPSS programs. The canonical Handbook is completely updated with more student-friendly features The Handbook of Social Work Research Methods is a cutting-edge volume that covers all the major topics that are relevant for Social Work Research methods. Edited by Bruce Thyer and containing contributions by leading authorities, this Handbook covers both qualitative and quantitative approaches as well as a section that delves into more general issues such as evidence based practice, ethics, gender, ethnicity, International Issues, integrating both approaches, and applying for grants. New to this Edition More content on qualitative methods and mixed methods More coverage of evidence-based practice More support to help students effectively use the Internet A companion Web site at www.sagepub.com/thyerhdbk2e containing a test bank and PowerPoint slides for instructors and relevant SAGE journal articles for students. This Handbook serves as a primary text in the methods courses in MSW programs and doctoral level programs. It can also be used as a reference and research design tool for anyone doing scholarly research in social work or human services. This book constitutes the proceedings of the 14th International Conference on Web Information Systems Engineering, WISE 2013, held in Nanjing, China, in October 2013. The 48 full papers, 29 short papers, and 10 demo and 5 challenge papers, presented in the two-volume proceedings LNCS 8180 and 8181, were carefully reviewed and selected from 198 submissions. They are organized in topical sections named: Web mining; Web recommendation; Web services; data engineering and database; semi-structured data and modeling; Web data integration and hidden Web; challenge; social Web; information extraction and multilingual management; networks, graphs and Web-based business processes; event processing, Web monitoring and management; and innovative techniques and creations. With the increasing sophistication of urban rail networks, the combined effects of rail transit on urban development are more and more complex and in-depth, and large-scale rail transit construction and operation have placed new demands on planning, construction, investment and financing. This main aim of these proceedings is to study and explore theoretical progress, methodological innovation and lessons learned in aspects of the planning stage, urban planning, architectural design, development and construction, safety systems, management support, etc. involved in the process of comprehensive utilization along urban rail transit lines and in the development and utilization of the surrounding land, in order to provide a platform for decision-makers and researchers involved in urban rail transit construction, urban construction and development. The must-read summary of Stephanie Culp's book: "Conquering the Paper Pile-Up: How to Sort, Organize, File and Store Every Piece of Paper in Your Home or Office". This complete summary of the ideas from Stephanie Culp's book "Conquering the Paper Pile-Up" shows how nowadays, everyone is finding themselves buried under a never-ending pile of paperwork which is slowly taking over their lives. Everyone is currently looking for a simple solution that will bring an end to their problem. In her book, the author presents an effective paper handling system that you can adapt and apply according to your own needs, which will ensure that you process your paperwork as soon as it

arrives. This summary is a must-read for anyone who wants to find and implement an efficient paper-handling system that will boost productivity and lower stress levels. Added-value of this summary: • Save time • Understand key concepts • Expand your knowledge To learn more, read "Conquering the Paper Pile-Up" and discover the key to effective paperwork management. This book examines the application of the World Trade Organization's (WTO) Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) in the fields of agriculture, public health and economic development in a Least Developed Country (LDC) such as Bangladesh. In particular, it evaluates the question whether the TRIPS' one-size-fits-all approach compulsorily applicable for all countries, irrespective of their development standing, fulfils the developmental needs of Bangladesh and other such LDCs in the fields of agriculture, public health and economic development. The book shows that the TRIPS' introduction of IPRs in the name of Plant Varieties Protection (PVP) and patents not only secures private sector investment in agriculture but also brings traditional agricultural practices within the spectrum of private monopoly, increases the price of agricultural products and forces people into dependency on engineered seeds and other agricultural inputs. To guard against such trade rules, this book recommends that Bangladesh should incorporate the TRIPS flexibilities in the form of redefining patentable invention, choosing between patents and PVP and providing for compulsory licensing. This book also reveals that the TRIPS patenting in pharmaceuticals encourages innovations by ensuring royalty collections and protects public health by raising standards of living. However, patenting offers exclusivity to pharmaceutical companies, extending the duration of the patent term and establishing their control over production, supply and distribution. Such control results in exclusivity over drug pricing. The flexibilities of the compliance deadline, compulsory licensing, and parallel importation built into the TRIPS are set to tackle untenable situations arising from patenting exclusivity. However, patent laws in most LDCs are out-dated in terms of dealing with such flexibilities. Given this, the research recommends that Bangladesh should invoke the TRIPS flexibilities. The author of this book further establishes that the TRIPS' standard-setting in agriculture and pharmaceuticals does not help the country to fulfil subsistence needs or promote economic development through innovation. However, the appropriation of agricultural and pharmaceutical goods during the use of the TRIPS flexibilities has the potential to feed the people, protect public health interests and increase economic development with the supply of food and drugs at home and abroad. To this end, the research asks Bangladesh to reform its existing IPRs provisions by redefining patentable inventions and simplifying compulsory licensing and other differential treatments to appropriate foreign technologies.

Basketball on Paper doesn't just stop with player evaluation: Dean Oliver occasionally applies business models to teamwork debates, and discusses strategy and variables of the game. How should an underdog change its strategy from when it is favored? How many wins or losses does a coach contribute? When is a good time to take a timeout? How much can a neutral but error-prone referee affect a team's chances of winning? Do teams rebound three-point shots more than two-point shots? Should Kentucky have pressed so much under Rick Pitino? What are the four statistical factors that a basketball team should control in order to win? La vida y el ministerio de Jesucristo. Este volumen es el primero de tres sobre el Nuevo Testamento. Abarca la vida de Cristo, desde la selección premortal como el Cordero de Dios a través de Su nacimiento e infancia. Luego seguimos al Maestro durante el primer año de Su ministerio, de como es tentado, bautizado, hace milagros, selecciona a los Doce Apóstoles, y luego enseña con parábolas y en el Sermón de la Montaña durante el segundo año de Su ministerio, Él enseña el sermón del Pan de Vida, se transfigura y otorga las llaves del sacerdocio a los Doce. Termina el segundo año de Su ministerio en Jerusalén, donde se declara a Sí mismo la Luz del Mundo, el Hijo de Dios y el Mesías. La cubierta exhibe la imagen clásica de "El Sermón de la Montaña", pintado por Carl Heinrich Bloch en 1890. How well can you decode the signs that permeate our daily lives? All of us, consciously or not, constantly engage in the acts of reading and interpreting the signs in the world around us. But how do we sharpen these skills, deepen our awareness of meaning in a complex world, and ultimately reach our full potential as university writers? This book answers the needs of students of composition, culture studies, and literature, providing a process-orientated guide to analyzing anything. For those who teach students in psychology, education, and the social sciences, the Handbook of Demonstrations and Activities in the Teaching of Psychology, Second Edition provides practical applications and rich sources of ideas. Revised to include a wealth of new material (56% of the articles are new), these invaluable reference books contain the collective experience of teachers who have successfully dealt with students' difficulty in mastering important concepts about human behavior. Each volume features a table that lists the articles and identifies the primary and secondary courses in which readers can use each demonstration. Additionally, the subject index facilitates retrieval of articles according to topical headings, and the appendix notes the source as it originally appeared in Teaching of Psychology, the official journal of the Society for the Teaching of Psychology, Division Two of the American Psychological Association. Volume I consists of 97 articles about strategies for teaching introductory psychology, statistics, research methods, and the history of psychology classes. Divided into four sections (one for each specialty), the book suggests ways to stimulate interest, promote participation, grasp psychological terminology, and master necessary scientific skills. Effective governance is the essential mission of the public sector. Good policy management is crucial if effective governance is to take place. This revised text successfully combines the theory and practice of public policy. This paper reviews quantitative tools of financial stability assessments under the Financial Sector Assessment Program (FSAP). A key focus of FSAPs is on methodologies to gauge risks on a system-wide level and propose mitigating measures. Therefore, the paper concentrates on the main elements of the FSAP's macroprudential stress testing framework:(i) the interaction among solvency, liquidity, and contagion risks in the banking sector, (ii) the assessment of the health of nonbank financial institutions (NBFIs), their interactions with banks and their impact on financial markets, (iii) the assessment of the health of nonfinancial sectors and their links to the financial sector, and (iv) macroprudential policy analysis. The paper also reviews recent improvements in microprudential bank solvency stress testing—an important foundation for the macroprudential stress testing framework—and discusses new tools for emerging risks (climate change, fintech, and cyber). The book will focus on exploiting state of the art research in semantic web and web science. The rapidly evolving world-wide-web has led to revolutionary changes in the whole of society. The research and development of the semantic web covers a number of global standards of the web and cutting edge technologies, such as: linked data, social semantic web, semantic web search, smart data integration, semantic web mining and web scale computing. These proceedings are from the 6th Chinese Semantics Web Symposium. Paper-Based Analytical Devices for Chemical Analysis and Diagnostics is a valuable source of information for those interested in microfluidics, bioanalytical devices, chemical instrumentation/mechanization, in-field analysis, and more. This book provides a critical review of the scientific and technological progress of paper-based devices, as well as future trends in the field of portable paper-based sensors for chemical analysis and diagnostics directly at point of need. It uniquely focuses on the analytical techniques associated with each type of device, providing a practical framework for any researcher to use while learning how to use new types of devices in their work, deciding which ones are best for their needs, developing new devices, or working toward commercialization. Reviews the evolution of this area and offers predictions for the future of the field of paper-based analytical devices Explores the analytical techniques used in development of paper-based devices Discusses challenges and shortcomings specific to each type of device, helping users and developers to avoid pitfalls Complete set of test methods including official, provisional, and classical. This book is intended for linguistic specialists, and deals with several problematic issues related to the linguistic structure of the English verb within a semantic framework. It contains five papers written within a research project the aim of which was to describe the central categories of the English verb (viz. tense and aspect) by means of methods and descriptive devices generally used in the field of formal logic. The papers discuss areas of the English temporal system that are notoriously difficult to grasp both for learners of the language and grammarians.
