*ECAI 2020* Jul 30 2020 This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

*Crucial Issues in Climate Change and the Kyoto Protocol* Dec 15 2021 *Crucial Issues in Climate Change and the Kyoto Protocol: Asia and the World* focuses on responses to climate change in the world's most populous region. This book provides the most comprehensive insight to the climate change discourse within Asia to date by drawing on the diverse disciplines and experience of legal practitioners, climate change consultants, government officials and academics. Individual chapters address issues such as how the various Asian countries ? highly disparate in their cultures, socio-economic conditions and political systems ? are responding to climate change, the challenges of mitigating and adapting to climate change, and the effective implementation of the Kyoto Protocol in Asia.

**Information and Communications Security** Feb 17 2022 This two-volume set LNCS 12918 - 12919 constitutes the refereed proceedings of the 23rd International Conference on Information and Communications Security, ICICS 2021, held in Chongqing, China, in September 2021. The 49 revised full papers presented in the book were carefully selected from 182 submissions. The papers in Part I are organized in the following thematic blocks: ? blockchain and federated learning; malware analysis and detection; IoT security; software security; Internet security; data-driven cybersecurity.

**Oxford Handbook of Anaesthesia** Nov 26 2022 Returning for its fifth edition, the Oxford Handbook of Anaesthesia has been re-energized by new editors and a specialist contributor team, while still retaining its much-loved, clear and concise style. Written for anaesthetists at all stages of their careers, from trainees sitting exams through to experienced consultants as well as ODPs and nurses involved in theatre area work and pre-assessment, this comprehensive guide to the anaesthetic world is as indispensable as ever. This new edition has been completely revised and brings you the most up-to-date guidance and information to keep pace with fast-moving areas of anaesthesia, including a completely revised regional anaesthesia chapter. Now in full colour and packed with enhanced illustrations throughout, including new ECG rhythm strips and illustrations of specialist equipment, the Handbook also includes colour coding for easier navigation. Designed for daily use, this Handbook is your essential companion to anaesthesia, with everything you need at your fingertips whether on the go or for revision.

**Security and Privacy in Communication Networks** Aug 31 2020 This two-volume set LNICST 304-305 constitutes the post-conference proceedings of the 15th International Conference on Security and Privacy in Communication Networks, SecureComm 2019, held in Orlando, FL, USA, in October 2019. The 38 full and 18 short papers were carefully reviewed and selected from 149 submissions. The papers are organized in topical sections on blockchains, internet of things, machine learning, everything traffic security communicating covertly, let's talk privacy, deep analysis,

systematic theory, bulletproof defenses, blockchains and IoT, security and analytics, machine learning, private, better clouds, ATCS workshop.

*Creating 3D Game Art for the iPhone with Unity* Jun 28 2020 With iPhone and Unity, game developers are empowered to create compelling games but they must be careful to specifically address the unique challenges of the iPhone hardware cpu and gpu requirements. This book teaches artists how to circumvent the potential pitfalls.

**Cloud Computing and Service Science** Aug 23 2022 This book constitutes extended, revised and selected papers from the 7th Ith International Conference on Cloud Computing and Service Science, CLOSER 2017, held in Porto, Portugal, in April 2017. The 16 papers presented in this volume were carefully reviewed and selected from a total of 123 submissions. CLOSER 2017 focused on the emerging area of Cloud Computing, inspired by some latest advances that concern the infrastructure, operations and available services throughout the global network.

**Understanding and Reducing Landslide Disaster Risk** Oct 21 2019 This book is a part of ICL new book series "ICL Contribution to Landslide Disaster Risk Reduction" founded in 2019. Peer-reviewed papers submitted to the Fifth World Landslide Forum were published in six volumes of this book series. This book contains the followings: • Five keynote lectures • Recent development in physical modeling of landslides • Recent development in numerical modeling of landslides • Recent development in soil and rock testing techniques, application and analysis methods • Recent advancements in the methods of slope stability and deformation analyses • Recent development in disaster risk assessment Prof. Binod Tiwari is a Vice President of the International Consortium on Landslides (ICL). He is the Associate Vice President for research and sponsored project and Professor of civil and environmental engineering at the California State University, Fullerton, California, USA. Prof. Kyoji Sassa is the Founding President and the Secretary-General of the International Consortium on Landslides (ICL). He has been the Editor-in-Chief of International Journal Landslides since its foundation in 2004. Prof. Peter Bobrowsky is the President of the International Consortium on Landslides. He is a Senior Scientist of Geological Survey of Canada, Ottawa, Canada. Prof. Kaoru Takara is the Executive Director of the International Consortium on Landslides. He is a Professor and Dean of Graduate School of Advanced Integrated Studies (GSAIS) in Human Survivability (Shishu-Kan), Kyoto University.

**Aiki Trading** Jul 10 2021 A great reference for all beginner traders. Aiki Trading will look at a robust method to understand what the market is doing in a specified timeframe. Essentially, markets are either trending up, trending down, or is in sideways or range bound congestion. Chapters are devoted to each of these three conditions, and the concepts are explained in depth. In addition, specific trading strategies will be explored for the different market conditions. These strategies are what I define as high probability, low risk trading strategies that have higher probability of success because it conforms to the nature of how markets behave. With more than 25 years of experience in financial markets, Jeffery's stock market career began in 1977 with JM Sassoon and continued with Kim Eng Securities. During his time in Stock-broking, Jeffery witnessed many cycles of boom and bust, including the 1987 meltdown in worldwide equity markets. In 1997, Jeffery joined Refco Singapore. During this time he developed new expertise in International Futures Markets and FX. Jeffery joined CMC in April 2007. He was responsible for the content and presentation of CMC's educational programmes. And he is currently the Resident Trainer with SGX Academy, and is based in Singapore.

**Secure Processors Part I** Apr 19 2022 This manuscript is the first in a two part survey and analysis of the state of the art in secure processor systems, with a specific focus on remote software attestation and software isolation. This manuscript first examines the relevant concepts in computer architecture and cryptography, and then surveys attack vectors and existing processor systems claiming security for remote computation and/or software isolation. This work examines in detail the modern isolation container (enclave) primitive as a means to minimize trusted software given practical trusted hardware and reasonable performance overhead. Specifically, this work examines in detail the programming model and software design considerations of Intel's Software Guard Extensions (SGX), as it is an available and documented enclave-capable system. Part II of this work is a deep dive into the implementation and security evaluation of two modern enclave-capable secure processor systems: SGX and MIT's Sanctum. The complex but insufficient threat model employed by SGX motivates Sanctum, which achieves stronger security guarantees under software attacks with an equivalent programming model. This work advocates a principled, transparent, and well-scrutinized approach to secure system design, and argues that practical guarantees of privacy and integrity for remote computation are achievable at a reasonable design cost and performance overhead.

*Singapore* Dec 27 2022 This paper discusses findings of the Report on Observance of Standards and Codes on Singapore. The Monetary Authority of Singapore (MAS) shows a very high level of compliance with the Basel Core Principles and demonstrates a strong commitment by MAS to their implementation. As a large financial center, MAS is well aware of the risks posed by a financial system that is significantly larger than the economy of Singapore, and comprised primarily of branches of foreign institutions operating in non-Singapore dollars. MAS has also set a high standard for approving foreign entrants, applying the same prudential framework to foreign branches as to its own locally incorporated banks.

Empirical Study on Asian Financial Markets Jan 24 2020 ??????????????????????

*Applied Cryptography and Network Security* Sep 19 2019 The LNCS volume 13269 constitutes the proceedings of the 20th International Conference on Applied Cryptography and Network Security, ACNS 2022, which will take place in a hybrid mode in Rome, Italy in June 2022. The 44 full papers together with 5 short papers presented in this proceeding were carefully reviewed and selected from a total of 174 submissions. They were organized in topical sections as follows: Encryption, Attacks, Cryptographic Protocols, System Security., Cryptographic Primitives, MPC, Blockchain, Block-Cyphers, and Post-Quantum Cryptography.

**A New Financial Market Structure for East Asia** Oct 13 2021 This book contends that the East Asian financial constitution lacks an appropriate infrastructure, resulting in inefficient allocation of high savings and an over-inflated short-term debt market. It goes on to point out that despite high savings, East Asia's dependency on financial centers outside the region is also relatively high, and that there is no strong region-wide network to connect various financial centers in East Asia. Against this economic background, the contributors make recommendations for the establishment of effective and stable capital recycling in East Asia. The financial intermediary function of the regional financial centers - Hong Kong, Singapore and Tokyo - is evaluated. Discussion focusses on

the issues of building an organic network between the financial markets of major economies in the region and enhancing the future role and function of those regional financial centres. The policy implications of the future development of regional financial markets - based on regional financial networks - that could potentially act as intermediaries between the high savings and productive sectors in East Asia are also examined. Concentrating on the major issues identified as central to building a new financial market structure in East Asia, this book will be appeal to those with a special interest in Asian studies and financial economics.

**Compaction of Argillaceous Sediments** May 28 2020 Compaction of Argillaceous Sediments

**OpenGL Insights** Nov 21 2019 Get Real-World Insight from Experienced Professionals in the OpenGL Community With OpenGL, OpenGL ES, and WebGL, real-time rendering is becoming available everywhere, from AAA games to mobile phones to web pages. Assembling contributions from experienced developers, vendors, researchers, and educators, OpenGL Insights presents real-world techniques for intermediate and advanced OpenGL, OpenGL ES, and WebGL developers. Go Beyond the Basics The book thoroughly covers a range of topics, including OpenGL 4.2 and recent extensions. It explains how to optimize for mobile devices, explores the design of WebGL libraries, and discusses OpenGL in the classroom. The contributors also examine asynchronous buffer and texture transfers, performance state tracking, and programmable vertex pulling. Sharpen Your Skills Focusing on current and emerging techniques for the OpenGL family of APIs, this book demonstrates the breadth and depth of OpenGL. Readers will gain practical skills to solve problems related to performance, rendering, profiling, framework design, and more.

*Financing for Entrepreneurs and Businesses* Oct 01 2020

*Singapore Financial and Business Sourcebook* Nov 14 2021 Apart from summarising the financial developments, reforms and policies over the past decades of the financial system in Singapore, this second edition of the Singapore Financial Sourcebook has been completely updated, revised and expanded.

Demystifying Internet of Things Security Mar 26 2020 Break down the misconceptions of the Internet of Things by examining the different security building blocks available in Intel Architecture (IA) based IoT platforms. This open access book reviews the threat pyramid, secure boot, chain of trust, and the SW stack leading up to defense-in-depth. The IoT presents unique challenges in implementing security and Intel has both CPU and Isolated Security Engine capabilities to simplify it. This book explores the challenges to secure these devices to make them immune to different threats originating from within and outside the network. The requirements and robustness rules to protect the assets vary greatly and there is no single blanket solution approach to implement security. Demystifying Internet of Things Security provides clarity to industry professionals and provides an overview of different security solutions What You'll Learn Secure devices, immunizing them against different threats originating from inside and outside the network Gather an overview of the different security building blocks available in Intel Architecture (IA) based IoT platforms Understand the threat pyramid, secure boot, chain of trust, and the software stack leading up to defense-in-depth Who This Book Is For Strategists, developers, architects, and managers in the embedded and Internet of Things (IoT) space trying to understand and implement the security in the IoT devices/platforms.

**SME Policy Index: ASEAN 2018 Boosting Competitiveness and Inclusive Growth** Feb 23 2020 The SME Policy Index is a benchmarking tool for emerging economies to monitor and evaluate progress in policies that support small and medium-sized enterprises.

**Macromolecular Crystallography** Nov 02 2020 Accurate molecular structures are vital for rational drug design and for structure-based functional studies directed toward the development of effective therapeutic agents and drugs. Crystallography can reliably predict structure, both in terms of folding and atomic details of bonding. \* Methodological methods in crystals \*

Methodological methods data analysis

*The Discovery of Cosmic Voids* May 08 2021 The large-scale structure of the Universe is dominated by vast voids with galaxies clustered in knots, sheets, and filaments, forming a great 'cosmic web'. In this personal account of the major astronomical developments leading to this discovery, we learn from Laird A. Thompson, a key protagonist, how the first 3D maps of galaxies were created. Using non-mathematical language, he introduces the standard model of cosmology before explaining how and why ideas about cosmic voids evolved, referencing the original maps, reproduced here. His account tells of the competing teams of observers, racing to publish their results, the theorists trying to build or update their models to explain them, and the subsequent large-scale survey efforts that continue to the present day. This is a well-documented account of the birth of a major pillar of modern cosmology, and a useful case study of the trials surrounding how this scientific discovery became accepted.

**Financial Derivatives: Markets And Applications (Fifth Edition)** Apr 07 2021 This book is designed for beginners who possess no previous knowledge or familiarity with derivatives. Written in an easy-to-read style, it guides readers through the challenging and complex world of forwards, futures, options, and swaps. The emphasis on Asian markets and contracts enables easier understanding. Financial derivative contracts from Malaysia and select contracts from Thailand, Singapore, and Hong Kong derivative markets are covered. For each derivative contract, their three common applications hedging, arbitrage, and speculating are shown with fully worked out examples. Extensive use of illustrations, graphics, and vignettes provide for easy comprehension of the underlying logic of derivatives.

**Companies Handbook of the Stock Exchange of Singapore Ltd** Apr 26 2020

**Business and Human Rights in Southeast Asia** Aug 19 2019 Business and human rights has emerged as a distinct field within the corporate governance movement. The endorsement by the United Nations Human Rights Council of a new set of Guiding Principles for Business and Human Rights in 2011 reinforces the State's duty to protect against human rights abuses by third parties, including business; the corporate responsibility to respect human rights; and greater access by victims to effective remedy, both judicial and non-judicial. This book draws on the UN Guiding Principles and recent national plans of action, to provide an overview of relevant developments within the ASEAN region. Bridging theory and practice, the editors have positioned this book at the intersection of human rights risk and its regulation. Chapter authors discuss the implications of key case-studies undertaken across the region and various sectors, with a particular focus on

extractive industries, the environment, and infrastructure projects. Topics covered include: due diligence and the role of audits; businesses' responsibilities to women and children; and the mitigation of human rights risks in the region's emerging markets. The book sheds light on how stakeholders currently approach business and human rights, and explores how the role of ASEAN States, and that of the institution itself, may be strengthened. In doing so, the book identifies critical challenges and opportunities that lie ahead for the region in relation to business and human rights. This book will be of excellent use and interest to scholars, practitioners and students of human rights, business and company law, international law, and corporate governance.

*Networked Systems* Sep 24 2022 This book constitutes the thoroughly refereed conference proceedings of the 6th International Conference on Networked Systems, NETYS 2018, held in Essaouira, Morocco, in May 2018. The 22 full and 6 short papers presented together with 11 keynotes and 2 invited papers were carefully reviewed and selected from 85 submissions. They are organized in the following topics: distribution; concurrency; verification; networking; self-stabilization; security; graph; and middleware.

*Mobile 3D Graphics SoC* Jun 09 2021 The first book to explain the principals behind mobile 3D hardware implementation, helping readers understand advanced algorithms, produce low-cost, low-power SoCs, or become familiar with embedded systems As mobile broadcasting and entertainment applications evolve, there is increasing interest in 3D graphics within the field of mobile electronics, particularly for handheld devices. In *Mobile 3D Graphics SoC*, Yoo provides a comprehensive understanding of the algorithms of mobile 3D graphics and their real chip implementation methods. 3D graphics SoC (System on a Chip) architecture and its interaction with embedded system software are explained with numerous examples. Yoo divides the book into three sections: general methodology of low power SoC, design of low power 3D graphics SoC, and silicon implementation of 3D graphics SoCs and their application to mobile electronics. Full examples are presented at various levels such as system level design and circuit level optimization along with design technology. Yoo incorporates many real chip examples, including many commercial 3D graphics chips, and provides cross-comparisons of various architectures and their performance. Furthermore, while advanced 3D graphics techniques are well understood and supported by industry standards, this is less true in the emerging mobile applications and games market. This book redresses this imbalance, providing an in-depth look at the new OpenGL ES (The Standard for Embedded Accelerated 3D Graphics), and shows what these new embedded systems graphics libraries can provide for 3D graphics and games developers.

**The Rise of the Corporate Economy in Southeast Asia** Sep 12 2021 The Rise of the Corporate Economy in Southeast Asia surveys the growth of large corporations in Southeast Asia, focusing in particular on corporate organization, methods of finance, the business environment and corporate governance. It details the different phases of corporate and financial development, particularly liberalization and globalization from the mid-1980s, the 1997 crisis, and subsequent attempts at liberalization and the reform of corporate governance. Raj Brown considers the key themes of the rise of the Southeast Asian corporate economy, and illustrates the theoretical issues through deployment of carefully selected country-specific case studies from across the region. An examination of critical subjects include: the variety of corporate forms found in Southeast Asia issues of ethnicity the concentration of ownership, particularly among families links between the state, the military, banks and corporations state-owned enterprises and forms of state control the role of foreign capital. Providing a comprehensive analysis of the rise of the corporate economy in Southeast Asia, this study will be an important resource for students of the region and those concerned with theoretical issues of corporate governance.

**Innovations in the Memory System** Jul 22 2022 The memory system has the potential to be a hub for future innovation. While conventional memory systems focused primarily on high density, other memory system metrics like energy, security, and reliability are grabbing modern research headlines. With processor performance stagnating, it is also time to consider new programming models that move some application computations into the memory system. This, in turn, will lead to feature-rich memory systems with new interfaces. The past decade has seen a number of memory system innovations that point to this future where the memory system will be much more than dense rows of unintelligent bits. This book takes a tour through recent and prominent research works, touching upon new DRAM chip designs and technologies, near data processing approaches, new memory channel architectures, techniques to tolerate the overheads of refresh and fault tolerance, security attacks and mitigations, and memory scheduling.

**STARGATE ATLANTIS From the Depths** Oct 25 2022

*Analyzing the Economics of Financial Market Infrastructures* Aug 11 2021 The prosperity and stability of any economic structure is reliant upon a foundation of secure systems that regulate the movement of money across the globe. These structures have become an integral part of contemporary society by reducing monetary risk and increasing financial security. *Analyzing the Economics of Financial Market Infrastructures* is a pivotal reference source for the latest scholarly research on the current developments in financial systems and how these processes are evolving due to new regulations and technical advances. Featuring extensive coverage on a range of relevant topics on payment systems, central securities depositories, central counterparties, and trade repositories, this book is an essential reference source for professionals in the financial sector, analysts, IT professionals, and academicians concerned with emerging research on financial markets. This book features timely, research-based chapters on a variety of crucial topics including, but not limited to, payment timing, multi-layer networks, transaction simulations, payment system analysis, and regulation of financial marketplaces.

*Routledge Handbook of Banking and Finance in Asia* Feb 05 2021 The Routledge Handbook of Banking and Finance in Asia brings together leading scholars, policymakers, and practitioners to provide a comprehensive and cutting-edge guide to Asia's financial institutions, markets, and systems. Part I provides a country-by-country overview of banking and finance in East, Southeast, and South Asia, including examples from China, Japan, Hong Kong, India, and Singapore. Part II contains thematic chapters, covering topics such as commercial banking, development banking, infrastructure finance, stock markets, insurance, and sovereign wealth funds. It also includes examinations of banking regulation and supervision, and analyses of macroprudential regulation, capital flow management measures, and monetary policy. Finally, it provides new insights into topical issues such as SME, green, and Islamic finance. This handbook is an essential resource for scholars and students of Asian economics and finance and for professionals working in financial markets in Asia.

**Financial Markets and Institutions in Singapore** Dec 23 2019 A reference covering Singapore's financial sector and the its strategy for becoming a financial center of global importance.

Financial institutions are described in detail, as are the operation of the key markets and Singapore's regulatory institutions and strategies. This edition highlights developments in Singapore's financial services industry.

Time-of-Flight and Depth Imaging. Sensors, Algorithms and Applications Dec 03 2020 Cameras for 3D depth imaging, using either time-of-flight (ToF) or structured light sensors, have received a lot of attention recently and have been improved considerably over the last few years. The present techniques make full-range 3D data available at video frame rates, and thus pave the way for a much broader application of 3D vision systems. A series of workshops have closely followed the developments within ToF imaging over the years. Today, depth imaging workshops can be found at every major computer vision conference. The papers presented in this volume stem from a seminar on Time-of-Flight Imaging held at Schloss Dagstuhl in October 2012. They cover all aspects of ToF depth imaging, from sensors and basic foundations, to algorithms for low level processing, to important applications that exploit depth imaging. In addition, this book contains the proceedings of a workshop on Imaging New Modalities, which was held at the German Conference on Pattern Recognition in Saarbrücken, Germany, in September 2013. A state-of-the-art report on the Kinect sensor and its applications is followed by two reports on local and global ToF motion compensation and a novel depth capture system using a plenoptic multi-lens multi-focus camera sensor.

*The Investor's Guide to Singapore* Jan 04 2021

Macromolecular Crystallography Mar 06 2021 Macromolecular crystallography is the study of macromolecules using X-ray crystallographic techniques to determine their molecular structure. This title synthesises contributions from a team of internationally recognized leaders, offering chapters on conventional and high-throughput methods.

*Handbook of Asian Finance* May 20 2022 Participants in Asian financial markets have witnessed the unprecedented growth and sophistication of their investments since the 1997 crisis. *Handbook of Asian Finance: REITs, Trading, and Fund Performance* analyzes the forces behind these growth rates. Insights into banking, fund performance, and the effects of trading technologies for practitioners to tax evasion, market manipulation, and corporate governance issues are all here, presented by expert scholars. Offering broader and deeper coverage than other handbooks, the *Handbook of Asian Finance: REITs, Trading, and Fund Performance* explains what is going on in Asia today. Presents the only micro- and market-related analysis of pan-Asian finance available today Explores the implications implicit in the expansion of sovereign funds and the growth of the hedge fund and real estate fund management industries Investigates the innovations in technology that have ushered in faster capital flow and larger trading volumes
