[Absolute Delusion, Perfect Buddhahood](#) Feb 29 2020 The San-chieh (Three Levels) was a popular and influential Chinese Buddhist movement during the Sui and T'ang periods, counting powerful statesmen, imperial princes, and even an empress, Empress Wu, among its patrons. In spite, or perhaps because, of its proximity to power, the San-chieh movement ran afoul of the authorities, and its teaching and texts were officially proscribed numerous times over a several-hundred-year history. This study of the San-chieh movement uses manuscripts discovered at Tun-huang to examine the doctrine and institutional practices of this movement in the larger context of Mahayana doctrine and practice.

[Forestry Technologies - A Complete Value Chain Approach](#) Sep 05 2020 The book on "Forestry Technologies – A Complete Value Chain Approach" has been designed to cater to the needs of the stakeholders by judiciously incorporating the recent technologies and research outputs available in various sectors of institutions. The book has four major themes viz., basic and strategic technology, production technology, processing and value addition technology and consumption technology. The basic and strategic technology incorporated seven chapters which include basic information and the recent scientific applications such as: nano technology and urban forestry technology. The production technology incorporated 16 chapters that includes all the recent developments such as: mini clonal technology, high yielding short rotation variety, land development and precision silvicultural technology, and multifunctional agroforestry. Processing and value addition technology incorporated 11 chapters and the consumption technology incorporated five chapters which include the recent developments in processing, value addition and the associated supply chain process. In a holistic perspective, the current book will serve as a readymade reference material to the practicing foresters, scientific professionals, wood based industries, policy makers, forestry students, financial and other academic and research institutions.

[Global Palaeoclimate of the Late Cenozoic](#) Jan 10 2021 This is a detailed description of the history and chronology of global climate based on event-signal stratigraphy. The history of global climate is described for the last fifty million years with the description for the last one million years in detail. Climatostratigraphic sequences of twelve key regions are taken as a basis, eight of them situated in the USSR territories. Chronology of climatic events of the Pleistocene, Pliocene and Miocene is developed based on palaeomagnetic and radiometric data. The authors' version of its correlation with oxygen-isotope scales of deep-sea sediments is given. Theoretical problems of climatic stratigraphy and palaeoclimatology are discussed, in particular, the causes of climatic change. The Northern Hemisphere palaeoclimatic reconstructions are made for the Holocene, Eemian and Pliocene temperature optima, considered as possible palaeoanalogues of climate of the 21st Century. The book is intended primarily for a wide circle of scientific workers, palaeoclimatologists and palaeogeographers, but will also interest geologists, biologists, palaeomagnetologists and archaeologists.

[Curriculum Evaluation In Malaysia: Aspirations And Realities](#) Sep 17 2021 Curriculum Evaluation In Malaysia: Aspirations And Realities Curriculum evaluation is among the popular areas of research in education in Malaysia. This inaugural lecture book aims to compare the aspirations and realities of curriculum evaluation in the country. The aspirations are based on concepts and purposes of curriculum evaluation and guidelines provided by some popular curriculum evaluation models. On the other hand, the realities of curriculum evaluation in Malaysia are presented based on a review of 50 randomly sampled reports of curriculum evaluation. The review resulted in a summary of the current state of curriculum evaluation practices in Malaysia. The comparison of the aspirations and realities of the curriculum evaluation practices found a diversity of approaches and methods used; all studies have evaluative features; most of the evaluation findings are for specific implications to the programme evaluated; the terms 'curriculum evaluation', 'programme evaluation', and 'curriculum research' are used interchangeably; less than half of the reports did not involve the use of an evaluation model; a large proportion of curriculum evaluation in higher education projects focused on outcome-based education and entrepreneurship education; and only a handful of the evaluation projects were conducted by decision and policy makers at ministerial level. In the light of these findings, implications to policy makers and curriculum practitioners are discussed.

[Lloyd Register of Shipping 1941 Steamers](#) Oct 26 2019 The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

[Lloyd Register of Shipping 1936 Steamers](#) Nov 07 2020 The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

[Essentials of Bioinformatics, Volume III](#) Oct 19 2021 Bioinformatics is an integrative field of computer science, genetics, genomics, proteomics, and statistics, which has undoubtedly revolutionized the study of biology and medicine in past decades. It mainly assists in modeling, predicting and interpreting large multidimensional biological data by utilizing advanced computational methods. Despite its enormous potential, bioinformatics is not widely integrated into the academic curriculum as most life science students and researchers are still not equipped with the necessary knowledge to take advantage of this powerful tool. Hence, the primary purpose of our book is to supplement this unmet need by providing an easily accessible platform for students and researchers starting their career in life sciences. This book aims to avoid sophisticated computational algorithms and programming. Instead, it will mostly focus on simple DIY analysis and interpretation of biological data with personal computers. Our belief is that once the beginners acquire these basic skillsets, they will be able to handle most of the bioinformatics tools for their research work and to better understand their experimental outcomes. The third volume is titled In Silico Life Sciences: Agriculture. It focuses on plant genetic, genomic, transcriptomic, proteomic and metabolomics data. Using examples of new crop diseases-emergence, crop productivity and biotic/abiotic stress tolerance, this book illustrates how bioinformatics can be an integral component of modern day plant science research.

[Sexual Reproduction in Higher Plants](#) Jul 04 2020 Based on papers presented at the International Symposium on Sexual Reproduction in Higher Plants, this volume covers the topics: micro- and macrosporogenesis, the activation and recognition of mature pollen, pollen germination and tube emission in vivo and in vitro, pollen and pollen tube cytoskeleton, stigma and style morphology, pollen/stigma interactions, incompatibility mechanisms and gene expression. The reinvestigation of classical topics using modern methods such as immunofluorescence, micromanipulation, freeze-substitution, electron microscopy, etc., is the common basis of all results presented. Especially applied aspects of sexual reproduction important e.g. for crop improvement, are discussed in detail.

[Lloyd Register of Shipping 1939 Steamers](#) Sep 25 2019 The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

[DAFTAR KATA 9 BAHASA : Melayu, Inggeris, Mandarin, Sepanyol, Arab, Jepun, Jerman, Thai, Perancis \(Penerbit UMK\)](#) Jun 14 2021 Merupakan buku daftar kata yang terdiri daripada 9 bahasa iaitu bahasa Melayu, bahasa Inggeris, bahasa Sepanyol, bahasa Arab, bahasa Jepun, bahasa Jerman, bahasa Mandarin, bahasa Thai dan bahasa Perancis. Merupakan rujukan penting bagi tenaga pengajar dan para pelajar Universiti Malaysia Kelantan serta pelajar yang sedang mengikuti kursus bahasa asing. Merangkumi sebanyak 77 topik penting. Mengandungi lebih daripada 52,000 entri yang terdiri daripada kata dasar dan frasa daripada 9 bahasa. Sebutan karakter bahasa Jepun, bahasa Thai dan bahasa Mandarin lebih mudah dengan ejaan huruf rumi serta sistem fonetik.

What's In The Name? How The Streets And Villages In Singapore Got Their Names Oct 07 2020 Since 1819, more than 6,200 place (street and village) names divided into more than 3,900 name groups were known in Singapore. Based on digitised historical newspapers, dated back to 1830, municipal records and Malay dictionaries, the origins, meanings and date of naming for many place names are uncovered. As part of Singapore history, place names known since 1936 are recorded in this book. Although place names are fairly static in nature, there have been more than 100 name changes. The naming trends transitioned from English to Malay and then back to English names.

Discover that Toa Payoh was not named after a big swamp, Anderson Road was named before John Anderson, a former Governor, took up his job and many more new findings in this exciting book. This book is a complete listing of all place names since 1936, together with the most comprehensive annotations to date — a first in Singapore. It is also the only book of its kind that analyses naming trends. Information on the origins or date of naming was based on primary sources such as old maps, minutes of municipal meetings, Chinese books and digitised newspapers. Contents: A Study of Singapore Place Names: Introduction Nomenclature of Singapore Place Names The Contents of Singapore Place Names Place Names of Chinese Origin Standardisation of Chinese Place Names Evolution of Place Names Conclusion Singapore Gazetteer Since 1936 and Annotations Readership: This book is meant for students as well as the general public interested in finding out the history behind Singapore's place names.

Keywords: Singapore; Place Name; Road; Street; Village; Toponymics; Statistic Review: Key Features: This is the most comprehensive book on the subject of toponymics using data from digitised newspapers dated back to 1830 that were unavailable in the past Use of information from Chinese sources, of which no English books on the same subject has been attempted before Analysis of place names and naming trends based on four main racial groups have not been performed previously

The Second Malaysian Family Life Survey Jan 02 2023 This document contains the Codebook for the data collected in the Second Malaysian Family Life Survey (MFLS-2), carried out in Peninsular Malaysia in 1988-1989. This document is essential for all those using the MFLS-2 data for analyses. The Codebook provides detailed descriptions of all variables and their locations in the MFLS-2 data files. The Codebook also presents information on cases that are known anomalies. The Codebook should be used in conjunction with the Survey Instruments (MR-107, MR-107/1) and the User's Guide (MR-109) for the MFLS-2. The Survey Instruments provide the details regarding the actual questions asked and the motivation behind those questions. The User's Guide discusses the file structure of the MFLS-2 database and addresses issues about identifying individuals of interest and linking the various subfile types to produce analytic files.

The Origins of Chinese Civilization Feb 20 2022 The seventeen contributors to this interdisciplinary volume bring to the study of early China the analytical concerns of archeology, art history, botany, climatology, cultural and physical anthropology, ethnography, epigraphy, linguistics, metallurgy, and political and social history. Readers interested in such topics as the origin of rice or millet agriculture, the origin of writing, the nature of the trie, and the processes of state formation will find much value here. They will find, too, major hypotheses about the cultural importance of ecogeographical zones in China, Neolithic interaction between the east coast and Central Plains, the remarkable homogeneity of early Chinese crania, and the links between the Hsia, Shang, and Chou dynasties. Relying on recently published archaeological evidence and the insights gained from carbon-14 and thermoluminescent datings, the authors provide original and significant interpretations of the nature of Chinese civilization in its formative stage and the processes by which civilizations form. Since there is little doubt that the complex of culture traits which defines Chinese civilization in the second and first millennia B.C. developed from a Chinese Neolithic stage, the origin of the Chinese civilization is worth studying not only in its own right but as an instance of the indigenous development of civilizations in general. This volume will appeal to all who are interested in the genesis of civilization and the transition from the Neolithic to the Bronze Age; it summarizes that state of present knowledge about China and suggests research strategies and hypotheses for the future. Contributors: Noel Barnard K. C. Chang Te-Tzu Chang Cheung Kwong-Yue Wayne H. Fogg Ursula Martius Franklin Morton H. Fried W. W. Howells Louisa G. Fitzgerald Huber Karl Jettmar David N. Keightley Fang Kuei Li Hui-Lin Li William Meacham Richard Pearson E. G. Pulleyblank Robert Orr Whyte This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1983.

Advanced Time-Correlated Single Photon Counting Applications Aug 29 2022 This book is an attempt to bridge the gap between the instrumental principles of multi-dimensional time-correlated single photon counting (TCSPC) and typical applications of the technique. Written by an originator of the technique and by successful users, it covers the basic principles of the technique, its interaction with optical imaging methods and its application to a wide range of experimental tasks in life sciences and clinical research. The book is recommended for all users of time-resolved detection techniques in biology, bio-chemistry, spectroscopy of live systems, live cell microscopy, clinical imaging, spectroscopy of single molecules, and other applications that require the detection of low-level light signals at single-photon sensitivity and picosecond time resolution.
