"Leopold's Shack and Ricketts's Lab brings fresh insight to the fertile ideas and writings of two innovators of early twentieth century ecology. In this insightful and important book, Michael J. Lannoo enriches the legacies of Leopold and Ricketts as early conservation-minded environmentalists and suggests that there is still much to be learned from them."--Katharine A. Rodger, editor of *Breaking Through: Essays, Journals, and Travelogues of Edward F. Ricketts* "Lannoo creatively explores an important story of compelling historical characters with a clear vision of their significance for today's readers."--Curt Meine, author

of Aldo Leopold: His Life and Work It is critical to quantify the various properties of soil in order to predict how it will behave under field loading for the safe design of soil structures. Quantification of these properties is performed using standardized laboratory tests. This lab manual prepares readers to enter the field with a collection of the most common of these soil mechanics tests. The procedures for all of these tests are written in accordance with applicable American Society for Testing and Materials (ASTM) standards. Scientist: Physics for Kids features biographies of 25 leading physicists, past and present, accompanied by accessible, hands-on experiments and activities to bring the history and principles of physics alive. Historical papers are prefixed to several issues. Book and Bio Sketch How often have you wondered about the meaning of life? Dan Smith's fictional saga Primal Ancestor will compel you to contemplate that ancient mystery and your place in the universe. The question about the meaning of life is different for everyone. The solution to that mystery can come easy for some and yet others might spend their entire lifetime

trying to find that elusive answer. For many, the answer begins in a most unexpected place the imagination. Primal Ancestor opens new doors of thought; you will find you have already begun a journey through time and space. Dan Sterling Smith has worked as a mechanic, welder, farmer, truck driver, soldier, house mover, construction supervisor, counselor, office manager, computer technician, and writer. He is a husband, father, uncle, brother, and grandfather. He lives with his best friend and wife, Rhonda, in the wilderness near Terra Bella, California. Watertown, Wisconsin, City Directory, 1887. history and genealogy research. Lab Monkey: I Survived, is the gripping true story of the life of Michael Young, an African American male born into poverty and subjected to secret involuntary medical testing and experiments disguised as treatment for his already debilitating condition of cataracts. Young leaves no stone unturned as he tells the story of his childhood life of going in and out of the hospital weeks and sometimes months at a time. Many of the other children never made it home. Michael is one who lived to tell it all. This is his story . . . Lab Monkey. Strictly off limits to the public, Plum Island is home

to virginal beaches, cliffs, forests, ponds -- and the deadliest germs that have ever roamed the planet. Lab 257 blows the lid off the stunning true nature and checkered history of Plum Island. It shows that the seemingly bucolic island in the shadow of New York City is a ticking biological time bomb that none of us can safely ignore. Based on declassified government documents, in-depth interviews, and access to Plum Island itself, this is an eye-opening, suspenseful account of a federal government germ laboratory gone terribly wrong. For the first time, Lab 257 takes you deep inside this secret world and presents

startling revelations on virus outbreaks, biological meltdowns, infected workers, the periodic flushing of contaminated raw sewage into area waters, and the insidious connections between Plum Island, Lyme disease, and the deadly West Nile virus. The book also probes what's in store for Plum Island's new owner, the Department of Homeland Security, in this age of bioterrorism. Lab 257 is a call to action for those concerned with protecting present and future generations from preventable biological catastrophes.
